

Original: English

**DRAFT RECOMMENDATION BY ICCAT TO ESTABLISH MINIMUM STANDARDS FOR  
FISHING VESSEL SCIENTIFIC OBSERVER PROGRAMS**

*Proposal submitted by the European Union*

*RECALLING* that Article IX of the Convention requires Contracting Parties to furnish, on the request of the Commission, any available statistical, biological and other scientific information needed for the purposes of the Convention;

*FURTHER RECALLING* the 2001 *Resolution by ICCAT on the Deadlines and Procedures for Data Submission* [Res. 01-16], in which the Commission established clear guidelines for the submission of Task I and Task II data;

*ACKNOWLEDGING* that poor quality data impacts the ability of the SCRS to complete robust stock assessments and provide management advice as well as the ability of the Commission to adopt effective conservation and management measures;

*DETERMINED* to ensure the collection of data accounting for all sources of mortality in ICCAT fisheries, for both target species and by-catch, to improve the certainty of future scientific advice while taking into account ecosystem considerations;

*RECOGNIZING* that observer programmes are used successfully at both the national and Regional Fisheries Management Organization (RFMO) level for the purposes of collecting scientific data;

*RECOGNIZING* the international nature of the fishing activity on and management of ICCAT species and the consequent need to embark well-trained observers to improve the collection of relevant data, in terms of consistency and quality;

*TAKING INTO ACCOUNT* the needs of developing States with regard to capacity building;

*RECOGNIZING* the United Nations General Assembly Sustainable Fisheries Resolution 63/112, that encourages the development of observer programmes by Regional Fisheries Management Organizations and arrangements to improve data collection;

*CONSIDERING* that the SCRS suggested that the current level of scientific observers (5%) seems to be inappropriate to provide reasonable estimates of total by-catch and recommended increasing the minimum level to 20%;

*FURTHER CONSIDERING* that the SCRS recommended studying the issue further, in order to determine the level of coverage appropriate to meet management and scientific objectives;

*RECOGNIZING* that the SCRS noted that the current mandatory level of observer coverage of 5% may have not been implemented by many of the fleets and underlined the need for achieving those minimum coverages so as the SCRS could address the mandate given by the Commission;

*ACKNOWLEDGING* that electronic monitoring systems were successfully tested in some fisheries and that the SCRS adopted minimum standards for their implementation for the tropical purse seine fleet;

*RECALLING* the *Recommendation by ICCAT to Establish Minimum Standards for Fishing Vessel Scientific Observer Programs* [Rec. 10-10] and desiring to enhance its provisions to improve the availability of scientific data and the safety of observers.

THE INTERNATIONAL COMMISSION FOR THE CONSERVATION  
OF ATLANTIC TUNAS (ICCAT) RECOMMENDS THAT:

***General Provisions***

1. Notwithstanding additional observer program requirements that may be in place or adopted by ICCAT in the future for specific fisheries or fishing activities, each Contracting Party and Cooperating non-Contracting Party, Entity, or Fishing Entity (CPC) shall implement the following minimum standards and protocols with respect to their domestic scientific observer programs to ensure the collection and reporting of relevant scientific information from ICCAT fisheries.

***Qualifications of Observers***

2. Without prejudice to any training or technical qualifications recommended by the SCRS, CPCs shall ensure that their observers have the following minimum qualifications to accomplish their tasks:
  - a) sufficient knowledge and experience to identify ICCAT species and fishing gear configurations;
  - b) satisfactory knowledge of the ICCAT Conservation and Management measures in force;
  - c) the ability to observe and record accurately the information to be collected under the Program;
  - d) be capable of performing the tasks set forth in point 6 below;
  - e) the ability to collect biological samples;
  - f) the ability, if needed and appropriate, to analyse images from on board cameras;
  - g) not be a crew member of the vessel being observed;
  - h) not be an employee of the fishing vessel company involved in the observed fishery;
  - i) not have current financial or beneficial interests in the fisheries being observed; and
  - j) be trained in safety and sea survival from an accredited institution or authority.

***Observer Coverage***

3. Each CPC shall ensure the following with respect to its domestic observer programs:
  - a) Pending SCRS advice on a fishery by fishery basis, a minimum of [5%] observer coverage of fishing effort in each of the pelagic longline, purse seine, and, as defined in the ICCAT glossary, baitboat, traps, gillnet and trawling fisheries, as measured:
    - a) for purse seine fisheries, in number of trips;
    - b) for pelagic longline fisheries, in fishing days, number of sets, or trips;
    - c) for baitboat and trap fisheries, in fishing days;
    - d) for gillnet fisheries, in fishing days; and
    - e) for trawling fisheries, in fishing trips;
  - b) Notwithstanding paragraph a), for vessels less than 15 meters, where an extraordinary safety concern may exist that precludes deployment of an onboard observer, a CPC may employ an alternative scientific monitoring approach that will collect data equivalent to that specified in this recommendation in a manner that ensures comparable coverage. In any such cases, the CPC wishing to avail itself of an alternative approach must present the details of the approach to the SCRS for evaluation. The SCRS will advise the Commission on the suitability of the alternative approach for carrying out the data collection obligations set forth in this Recommendation.

Alternative approaches implemented pursuant to this provision shall be subject to the approval of the Commission at the annual meeting prior to implementation.

- c) Representative temporal and spatial coverage of the operation of the fleet to ensure the collection of adequate and appropriate data as required under this Recommendation and any additional domestic CPC observer program requirements, taking into account characteristics of the fleets and fisheries;
  - d) Data collection on pertinent aspects of the fishing operation, including catch and fishing effort, as detailed in paragraph 6.
4. CPCs may conclude bilateral arrangements whereby one CPC places its domestic observers on vessels flying the flag of another CPC, in accordance with this Recommendation.
  5. CPCs shall endeavour to ensure that observers alternate vessels between their assignments.

#### ***Tasks of the Observer***

6. CPCs shall require, *inter alia*, observers to:
  - a) record and report upon the fishing activity of the observed vessel, which shall include at least the following:
    - i. data collection, that includes quantifying total target catch, discards and by-catch (including sharks, sea turtles, marine mammals, and seabirds), size composition, disposition status (i.e., retained, discarded dead, released alive), the collection of biological samples for life history studies (e.g., gonads, otoliths, spines, scales);
    - ii. report on tags found and collect them;
    - iii. fishing operation information, including:
      - area of catch by latitude and longitude;
      - fishing effort information (e.g., number of sets, number of hooks, etc.);
      - date of each fishing operation, including, as appropriate, the start and stop times of the fishing activity;
      - use of fish aggregating objects, including FADs; and
      - general state of released animals.
  - b) observe and record the use of by-catch and discard mitigation measures, and other relevant information;
  - c) where available and as appropriate, analyse images from on board cameras, in support of the data collection referred to in a and b above;
  - d) observe and report environmental related parameters;
  - e) perform any other scientific tasks as recommended by SCRS and agreed by the Commission.

#### ***Obligations of the Observer***

7. CPCs shall ensure that the observer:
  - a) does not interfere with the electronic equipment of the vessel;
  - b) is familiar with the emergency procedures aboard the vessel, including the location of life rafts, fire extinguishers and first aid kits;
  - c) communicates as needed with the Master on relevant observer issues and tasks;

- d) does not hinder or interfere with the fishing activities and the normal operations of the vessel;
- e) participates in a debriefing session(s) with appropriate representatives of the concerned scientific institute or the national authority;

***Obligations of the Master***

8. CPCs shall ensure that the Master of the vessel to which the observer is assigned:

- a) permits appropriate access to the vessel and its operations;
- b) allows the observer to carry out his/her responsibilities in an effective way, including by:
  - i. providing full access to the vessel's crew, gear, documentation, and catch;
  - ii. communicating at any time with appropriate representatives of the scientific institute or domestic authority;
  - iii. ensuring full access to electronics and other equipment pertinent to fishing, including but not limited to:
    - Satellite navigation equipment
    - Radar display screens during utilisation
    - Electronic means of communication;
  - iv. ensuring that no one on board the observed vessel tampers with or destroys observer equipment or documentation; obstructs, interferes with, or otherwise acts in a manner that could unnecessarily prevent the observer from performing his/her duties; intimidates, harasses, or harms the observer in any way; or bribes or attempts to bribe the observer.
- c) provides accommodation to observers, including lodging, food and adequate sanitary and medical facilities, equal to those of officers;
- d) provides the observer adequate space on the bridge or pilot house to perform his/her tasks, as well as space on deck adequate for carrying out observer tasks;

***Observer Report***

9. CPCs shall ensure that the observer:

- a) compiles the information collected in accordance with this Recommendation in an observer report, if possible in electronic format; and
- b) submits the observer report, including raw data collected by the observer, to the relevant scientific institute or domestic authority in a timely way.

***Duties of the CPCs***

10. Each CPC shall:

- a) require its vessels, when fishing for ICCAT species, to carry a scientific observer in accordance with the provisions of this recommendation.;
- b) oversee the safety of its observers, including by implementing the requirements set forth in this recommendation and any other relevant recommendation(s) that may be adopted by the Commission;

- c) encourage, where feasible and appropriate, their scientific institutes/domestic authorities to enter into agreements with the scientific institutes/domestic authorities of the other CPCs for the exchange of observer reports and observer data between them;
- d) provide in its Annual report for use by the Commission and the SCRS, specifics on the implementation of this recommendation, which shall include:
  - i. details on the structure and design of their scientific observer programs, including, *inter alia*:
    - the target level of observer coverage by fishery and gear type as well as how measured
    - data required to be collected
    - data collection and handling protocols in place
    - information on how vessels are selected for coverage to achieve the CPC's target level of observer coverage
    - observer training (including safety) requirements, including URL links to any training materials, such as a training manual;
    - observer safety protocols and procedures and equipment issued
    - observer qualification requirements
  - ii. the number of vessels monitored, the coverage level achieved by fishery and gear type, and details on how those coverage levels were calculated;

Following the initial submission of the information required under paragraph 15(f)(i), CPC shall report changes to the structure and/or design of its observer programs in its Annual Reports only when such changes occur.

- e) Consistent with domestic confidentiality requirements, annually submit using the electronic format developed by the SCRS in consultation with the Secretariat, data collected through domestic observer programs for use by the Commission, in particular for stock assessment and other scientific purposes; and
- f) ensure implementation of robust data collection protocols by its observers, when carrying out their tasks referred to in paragraph 6, including, as necessary and appropriate, the use of photography.

#### ***Duties of the Executive Secretary***

- 11. The Executive Secretary facilitates access by SCRS and the Commission to relevant data and information submitted pursuant to this recommendation;

#### ***Duties of the SCRS***

- 12. The SCRS:
  - a) establishes standardized data variables to be collected through CPC scientific observer programs and, in consultation with the Secretariat, develops an electronic reporting format for providing observer data to ICCAT.
  - b) develops, as needed and appropriate, an observer working manual for use by CPCs in their domestic observer programs where needed, that includes model data collection forms and standardized data collection procedures, taking into account observer manuals and related materials that may already exist through other sources, including CPCs, regional and sub-regional bodies, and other organizations;
  - c) develops/adopts guidelines for electronic monitoring systems;
  - d) reports to the Commission at each Annual meeting on the coverage level achieved by each CPC by fishery and gear type and how this level was calculated;

- e) provides the Commission with a summary of the scientific data and information collected and reported pursuant to this recommendation and any relevant associated findings;
- f) makes recommendations, as necessary and appropriate, on how to improve the effectiveness of scientific observer programs in order to meet the data needs of the Commission, including possible revisions to this Recommendation and/or with respect to implementation of these minimum standards and protocols by CPCs.

***Electronic Monitoring Systems***

- 13. Electronic monitoring systems may be installed on board of the fishing vessels as alternative to collect independent and accurate information on fishing activities, to complement or, where feasible, pending SCRS advice and a Commission decision, to replace the human observer on board.
- 14. Electronic monitoring systems should comply with guidelines adopted by SCRS.
- 15. CPCs are encouraged to report to the SCRS their experiences in the use of electronic monitoring systems in their ICCAT fisheries to complement human observer programs. CPCs who have not yet implemented such systems are encouraged to explore their use and report their findings to the SCRS.

***Support to Developing States***

- 16. Developing States shall report to the Commission on their special requirements in the implementation of the provisions of this Recommendation. The Commission shall take due regard of these special requirements.
- 17. Available ICCAT funds may be used to support the implementation of scientific observer programs in developing States, notably the training of observers.

***Final provision***

- 18. The Commission shall review this Recommendation no later than its [2019] annual meeting and consider revising it, in particular, in the light of information provided by CPCs and of SCRS recommendations.
- 19. Recommendation [10-10] is repealed and replaced by this Recommendation.
