STATEMENT TO ICCAT INSPECTION REPORT N. 7850

ICCAT inspectors:

Iva Jugovic: ICCAT card no. EU-HR 0091/2023
Francesco Siniscalchi: ICCAT card no. EU-ITA 0329/2024

OPV: OCEAN SENTINEL, IRCS: CQJF

The inspected fishing vessel, ALB-OTB-FERRA II, was not listed on the ICCAT Record of Vessels at the time of inspection.

This statement is issued to complement and amend ICCAT Inspection Report No. 7850, following the identification of additional elements after the completion of the onboard inspection, based on document cross-checks and analysis of supporting evidence.

Point 11 "Infringements of ICCAT conservation and management measures observed" is amended as follows:

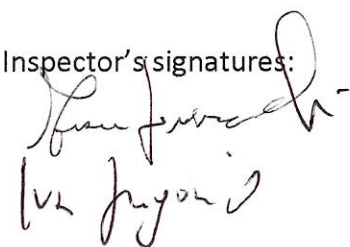

1. The fishing vessel was observed engaging in fishing activities targeting bluefin tuna (BFT), using handlines, without holding the requisite fishing licence or authorisation and without being included in the ICCAT Record of BFT Catching Vessels, contrary to the vessel-authorisation, vessel-record and fishing-logbook requirements established under ICCAT Recommendation 25-04, establishing a multi-annual management plan for bluefin tuna in the eastern Atlantic and the Mediterranean. In addition, no fishing logbook, Bluefin Tuna Catch Document (BCD), or other documentation relating to the vessel's BFT fishing activities was available on board at the time of inspection. The absence of a BCD is contrary to the ICCAT Bluefin Tuna Catch Documentation Programme established under ICCAT Recommendation 23-21.
2. The intentional taking or retention of BFT in contravention of applicable ICCAT conservation and management measures constitutes a serious infringement pursuant to paragraph 1(e) of Annex 7 (ICCAT Scheme of Joint International Inspection) to ICCAT Recommendation 25-04.

Section Serious violation observed section is amended as follows:

1. The intentional taking or retention of BFT in contravention of applicable ICCAT conservation and management measures
2. Multiply violations which taken together constitute a serious disregard of measures in force pursuant to the ICCAT

Référence : Recommandation ICCAT 25-04 remplaçant la recommandation 24-05 établissant un plan pluriannuel de gestion du thon rouge dans l'Atlantique Est et la Méditerranée

Sur la déclaration de transfert N° TUN-2026/003/ITD du 25/05/2026, le capitaine du navire de capture «JAWHAR» a estimé que 3635 thons rouges ont été transférés.

Après visionnage de la vidéo de transfert entre le navire de capture «JAWHAR» et la cage numéro «EU-MLT-016-MB» du remorqueur «ALDO», les inspecteurs des pêches ont estimé que 4173 thons rouges ont été transférés.

La différence des estimations étant supérieur à 10 %, la vidéo de transfert est donc non conforme au paragraphe 137 de la Recommandation ICCAT 25-04.

STATEMENT TO ICCAT INSPECTION REPORT No 7864

ICCAT inspectors:

Ivan ZAPALAC:	ICCAT card No. EU-HRV-0140/2026
Lorenzo SUMA:	ICCAT card No. EU-ITA-0286/2023
Aniello FERRUZZI:	ICCAT card No. EU-ITA-0372/2026

OPV: OCEAN SENTINEL, IRCS: CQJF

Inspected fishing vessel: MLT TOW LELI, ICCAT number AT0036190.

This statement is issued for the purpose of supplementing and amending ICCAT Inspection Report No. 7864, following the identification of additional elements after completion of the onboard inspection, based on subsequent documentary cross-checks and an analysis of the supporting evidence.

During the pre-boarding phase, dead bluefin tuna was observed in the cage EU-MLT-035-FF. At the time of the inspection, the mortalities had not been recorded in the corresponding template, constituting a non-compliance with Annex 11 of ICCAT Recommendation 25-04.

During the inspection, copies of three video recordings were collected for further analysis on board OPV Ocean Sentinel. Following a detailed review of the footage, the inspection team reached the following conclusions:

Video related to the first transfer from DZA PS BENI LOUMA to MLT TOW LELI on 18 June 2026:

- The video recording of the entire transfer operation was split into two separate video files, which constitutes a failure to comply with paragraph 1(c) of Annex 8 of ICCAT Recommendation 25-04.
- The date and time were not continuously displayed throughout the video recordings, constituting a failure to comply with paragraph 1(b) of Annex 8 of ICCAT Recommendation 25-04.
- Consequently, the difference between the number of tuna estimated by the inspection team and the quantity declared in ITD DZA/2026/017/ITD could not be estimated with sufficient reliability.

Video related to the transfer from MLT TOW LELI to TUN TOW WAEL on 19 June 2026:

- The video recording of the entire transfer operation was split into two separate video files, which constitutes a failure to comply with paragraph 1(c) of Annex 8 of ICCAT Recommendation 25-04.
- The date and time were not continuously displayed throughout the video recordings, constituting a failure to comply with paragraph 1(b) of Annex 8 of ICCAT Recommendation 25-04.
- Consequently, the difference between the number of tuna estimated by the inspection team and the quantity declared in ITD DZA/2026/017/ITD could not be estimated with sufficient reliability.

Video related to the first transfer from LBY PS AL-FATAYEH to MLT TOW LELI on 21 June 2026:

- The video recording of the entire transfer operation was split into two separate video files, which constitutes a failure to comply with paragraph 1(c) of Annex 8 of ICCAT Recommendation 25-04.
- The date and time were not continuously displayed throughout the video recordings, constituting a failure to comply with paragraph 1(b) of Annex 8 of ICCAT Recommendation 25-04.
- In view of the deficiencies identified, the inspection team was unable to establish with sufficient reliability the difference between the number of tuna estimated and the quantity declared in ITD LBY/2026/019/ITD.

Considering the facts listed above, the ICCAT Inspection Report No 7864 shall be amended as follows:

Point 9.4 shall be amended as follows:

Other (specify) "NO" to be replaced with **"Template of Reporting of fish that die during transfers and towing operations"**

Point 11 "Infringements of ICCAT conservation and management measures observed" shall be amended as follows:

"4 suspected infringements detected:

1. **Mortalities are not properly recorded according to p.139 and Annex 11 of ICCAT Recommendation 25-04**
2. **The video related to the first transfer from DZA PS BENI LOUMA to MLT TOW LELI from 18/06/2026 is not compliant with the minimum standards for video recording procedures set in Annex 8 of ICCAT Recommendation 25-04.**
3. **The video related to the further transfer from MLT TOW LELI to TUN TOW WAEL from 19/06/2026 is not compliant with the minimum standards for video recording procedures set in Annex 8 of ICCAT Recommendation 25-04.**
4. **The video related to the first transfer from LBY PS AL-FATAYEH to MLT TOW LELI from 21/06/2026 is not compliant with the minimum standards for video recording procedures set in Annex 8 of ICCAT Recommendation 25-04."**

STATEMENT TO ICCAT INSPECTION REPORT No 7860

ICCAT inspectors:

Ivan ZAPALAC:	ICCAT card No. EU-HRV-0140/2026
Lorenzo SUMA:	ICCAT card No. EU-ITA-0286/2023
Aniello FERRUZZI:	ICCAT card No. EU-ITA-0372/2026

OPV: OCEAN SENTINEL, IRCS: CQJF

Inspected fishing vessel: MLT TOW SAN GORG III, ICCAT number AT0005506.

This statement is issued for the purpose of supplementing and amending ICCAT Inspection Report No. 7860, following the identification of additional elements after completion of the onboard inspection, based on subsequent documentary cross-checks and an analysis of the supporting evidence.

During the inspection, the inspection team obtained a copy of the video recording relating to the transfer operation from the Tunisian catching vessel SALLEM (ICCAT No. AT0002627) to the Tunisian towing vessel KAMEL BOUCHEMA (ICCAT No. AT0067031) for further examination on board OPV Ocean Sentinel. Following a detailed review of the video material, the inspection team identified the following elements relevant for the assessment of compliance:

- The video recording of the transfer operation was provided in four separate video files.
- No interruption was identified between the first and second video files (file names ISAW0001 and ISAW0002).
- The timestamps indicate an 11-second interruption between the second and third video files (ISAW0002 and ISAW0003). The second file ends at 12:29:57 h, when the cage door appears to be closed, while the third file starts at 12:30:08 h, showing the cage door open. During this interval, it was not possible to verify the cage identification number or to determine whether any fish were transferred.
- The timestamps indicate a further interruption of approximately 13 minutes between the third and fourth video files (ISAW0003 and ISAW0004), with the third file ending at 12:30:10 h and the fourth file starting at 12:43:12 h. During this interval, it was not possible to verify whether any fish were transferred.

On the basis of the above elements, the inspection team considers that the video recording is interrupted and does not provide continuous coverage of the entire transfer operation. This constitutes a suspected non-compliance with paragraph 1(c) of Annex 8 of ICCAT Recommendation 25-04.

Due to the interruptions and deficiencies identified in the video material, the available evidence does not allow the inspection team to establish, with sufficient reliability, any difference between the number of tuna estimated during the transfer and the quantity declared in TUN/2026/064/ITD.

In view of the facts, observations, and supporting evidence set out above, ICCAT Inspection Report No. 7860 should be supplemented and amended as follows:

Point 11 "Infringements of ICCAT conservation and management measures observed" shall be amended as follows:

"The video related to the first transfer from TUN PS SALLEM to TUN TOW KAMEL BOUCHEMA AND MLT TOW NILE from 24/06/2026 is not compliant with the minimum standards for video recording procedures set in Annex 8 of ICCAT Recommendation 25-04."

Attachment to ICCAT report number 11369

During a patrol operation conducted in international waters with the EFCA patrol vessel OCEAN SENTINEL, at 12:15 UTC, the fishing vessel "KRISTU RE II", registration number MFA115, was detected.

Prior to the inspection attempt, preliminary checks were carried out through the relevant EU and ICCAT databases, confirming that the vessel was the Maltese-flagged fishing vessel CFR MLT00MFA0115, authorised by ICCAT to operate for Bluefin Tuna (BFT) and Swordfish (SWO) fisheries under ICCAT authorisation No. AT0005532.

At 12:35 UTC, several attempts were made to contact the master of the fishing vessel via VHF channel 16 in order to inform him of the intention to conduct an on-board inspection. Despite repeated radio calls, no response was received from the fishing vessel.

At 13:00 UTC, an inspection team (2 EU/ICCAT inspectors) were deployed by dinghy from the EFCA patrol vessel OCEAN SENTINEL and proceeded towards the fishing vessel.

At 13:08 UTC, after coming alongside the fishing vessel, we observed that the fishing vessel, with five (5) persons on board, was engaged in fishing activities using nets. From close proximity, we verbally informed the master, in the English language, of intention to conduct an on-board inspection following the completion of the fishing activity. We identified ourselves as European Union and ICCAT inspectors.

The master of the fishing vessel responded in English, in an agitated and intimidating manner, stating that he would not allow the inspection team to board the fishing vessel because we did not speak the Maltese language. The master further refused to continue communication with us because we were not Maltese nationals.

We informed the master that we were acting as EU and ICCAT inspectors, and that obstructing, refusing, or unduly delaying an inspection constitutes an infringement.

Despite being informed accordingly, the master continued to refuse access to the fishing vessel and did not allow the inspection to be carried out.

At 13:14 UTC, the fishing vessel ceased fishing activity and immediately moved away from the position of the inspection team. Once the fishing vessel was no longer within clear visual range, it was observed that the vessel conducted on-board operations; however, due to the distance reached, the nature of these operations could not be further determined.

Considering that access to the fishing vessel was denied and that the inspection could not be completed, we returned to the EFCA patrol vessel OCEAN SENTINEL. Prior to returning to

the patrol vessel, we verified the identification markings on the fishing gear (gillnet) that had been deployed by the fishing vessel before leaving.

At 13:45 UTC, the fishing vessel approached the port side of the EFCA patrol vessel and informed via radio about its availability for on-board inspection. Through the radio station, we replied to the master of the fishing vessel that the inspection was completed at the moment when he, as the master of the fishing vessel, refused the inspection and left the inspection site. After that we continued navigation.

OPV: OCEAN SENTINEL, IRCS: CQJF

Inspected fishing vessel: MAR-PS-AZROU 1, ICCAT number AT0006869.

This statement is issued to complement and amend ICCAT Inspection Report No. 11379, following the identification of additional elements after the completion of the onboard inspection, based on document cross-checks and analysis of supporting evidence.

Point 9.2 is amended as follow:

Infringement NO to **YES**

Point 11 "Infringements of ICCAT conservation and management measures observed" is amended as follows:

Initial entry: "**No infringement detected**". Corrected entry: "**2 suspected infringements detected**":

1. Fishing vessel was not visible in the VMS tracking system according to par.222 of ICCAT recommendation 25-04
2. Misrecording of catch-related data in the BCD (incorrect fishing area and gear, inconsistent with ITD), contrary to ICCAT Recommendation **11 20 (BCD Programme, as amended by Rec. 18 13)** and constituting misreporting as per ICCAT Rec. **25-04 Annex 7. Description:** Fishing area incorrectly recorded as Adriatic Sea, while the position indicated in the ITD (N35°04; E014°21) corresponds to the Ionian Sea and Fishing gear incorrectly recorded as baitboat, whereas the operation involved a purse seiner.

STATEMENT TO ICCAT REPORT 11353
RELATED TO MOR GND SIHRIA 3 – AT000MAR01805
DATE 20 MAY 2026

The undersigned inspectors deployed onboard of EFVA OPV OCEAN SENTINEL – CQJF, on the 20th of May 2026 with this document state that:

Resume of the activity: The inspection team spotted the vessel from the patrol means while it was retrieving its gear. When the team was trying to approach the fishing vessel (FV), the master cut the driftnet (GND) and left the area at speed. Despite this, the inspection team managed to intercept FV *SIHRIA 3* and attempted to establish communication with the crew. The master and crew stated that they only spoke Arabic, which prevented the inspection from being completed due to the lack of communication.

One inspector briefly boarded the vessel and took a picture of the fishing licence. However, no logbook or other documentation was presented to the inspection team, despite repeated requests, including the personal document of the master. At that stage, no catches were visible on deck, except for a single specimen of skipjack tuna (SKJ).

The inspection team left the area to proceed towards another target in the vicinity considering the impossibility to conclude the inspection.

Shortly afterwards, the patrol means observed FV *SIHRIA 3* resuming retrieval of its gear. For this reason, the inspection team returned and re-approached the vessel. At this stage, the vessel brought onboard a large dolphin (*Delphinus delphis*) caught in the driftnet. A few minutes later, several pieces of swordfish (SWO) were also retained onboard, while three specimens of *Mola mola* (MOX) were discarded immediately after retrieval.

In addition, please note that the following comments relate to ICCAT IR 11353, in the sections indicated:

1. **Section 10** – The species caught were not directly inspected, as the master declared that he only spoke Arabic, and it was not possible to board the vessel again during the gear retrieval phase.
2. **Section 11** – Inspectors raised a suspected infringement for the attempt to interfere with the inspection, while the FV cut the gear and tried to evade from the inspection; inspectors raised a suspected infringement for use of an illegal gear

GND not listed in the ICCAT authorization for vessel (handliner and pole lines – hand operated).

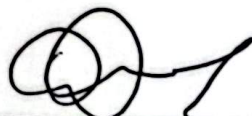

3. 2. A total of 4 suspected infringements were raised resulting in multiple violations as stated in the list at page 4 of the report.

Written, read and confirmed.

Référence : Recommandation ICCAT 25-04 remplaçant la recommandation 24-05 établissant un plan pluriannuel de gestion du thon rouge dans l'Atlantique Est et la Méditerranée

Sur la déclaration de transfert N° TUR-2026/084/ITD du 27/05/2026, le capitaine du navire de capture « BOZUGLU KARDESLER 2 » a estimé que 314 thons rouges ont été transférés dans la cage numéro «TUR-BAS-2026-002 » du remorqueur «IBISLER BALIKCILIK».

Après visionnage de la vidéo de transfert entre le navire de capture «BOZUGLU KARDESLER 2» et la cage numéro «TUR-BAS-2026-002 » du remorqueur «IBISLER BALIKCILIK», les inspecteurs des pêches ont constaté que le numéro de la cage supposée être «TUR-BAS-2026-002 » n'a pas été filmé.

La vidéo de transfert est donc non-conforme au paragraphe 119 annexe 8 de la recommandation ICCAT 25-04.

Référence : Recommandation ICCAT 25-04 remplaçant la recommandation 24-05 établissant un plan pluriannuel de gestion du thon rouge dans l'Atlantique Est et la Méditerranée

Sur la déclaration de transfert N° TUR-2026/098/ITD du 27/05/2026, le capitaine du navire de capture « KASIRGA 2 » a estimé que 296 thons rouges ont été transférés dans la cage numéro «TUR-BAS-2026-003 » du remorqueur «GORENLER 3».

Après visionnage de la vidéo de transfert entre le navire de capture « KASIRGA 2 » et la cage numéro «TUR-BAS-2026-003 » du remorqueur «GORENLER 3», les inspecteurs des pêches ont estimé que 281 thons rouges ont été transférés.

La différence des estimations étant inférieur à 10 %, la vidéo de transfert est donc conforme au paragraphe 137 de la Recommandation ICCAT 25-04.

Après visionnage de la vidéo de transfert entre le navire de capture «KASIRGA 2» et la cage numéro «TUR-BAS-2026-003», les inspecteurs des pêches ont constaté que la déclaration de transfert N° TUR-2026/098/ITD est datée du 27/05/2026 alors que la vidéo de transfert indique la date du 28/05/2026. l'ITD n'est donc pas conforme au paragraphe 130 et à l'annexe 4 de la Recommandation ICCAT 25-04.

**Complément d'information concernant le rapport d'inspection du navire remorqueur
«HASAN COBAB» Immatriculé AT 0069446
dossier ICCAT n° : 2026/3927/GYPTIS B**

Référence : Recommandation ICCAT 25-04 remplaçant la recommandation 24-05 établissant un plan pluriannuel de gestion du thon rouge dans l'Atlantique Est et la Méditerranée

Sur la déclaration de transfert N° TUR-2026/185/ITD du 05/06/2026, le capitaine du senneur « BURHAN REIS 5 » a estimé que 850 thons rouges ont été transférés dans la cage numéro «TUR-SAG-2026-024» du remorqueur «HASAN COBAN».

Après visionnage de la vidéo de transfert entre le navire de capture « BURHAN REIS 5 » et la cage numéro «TUR-SAG-2026-024 » du remorqueur «HASAN COBAN», les inspecteurs des pêches ont estimé que 809 thons rouges ont été transférés.

La différence des estimations étant inférieur à 10 %, la vidéo de transfert est donc conforme au paragraphe 137 de la Recommandation ICCAT 25-04.

Le «HASAN COBAN» n'as pas pu mettre à la disposition de l'équipe de contrôle une échelle de pilote conforme tel que définie par l'annexe 7 article 1 r) et article 9 de la recommandation ICCAT 2025-04.

12. Inspector's comments (if necessary use a complementary sheet specifying: "attachment to ICCAT report number xxx")

During inspection, it was noticed that the logbook had only one page written; the departure date, no other pages were written, this is in contravention of par 75. 110 and Annex 2 point B of ICCAT REC 25.04, so it is a possible non compliance. Inspection is subject to further investigation and an additional statement will be produced if necessary *

OPV: OCEAN SENTINEL, IRCS: CQJF

Inspected fishing vessel: TUR TOW MOLLAOGULARI 1, ICCAT number AT0062373.

This statement is issued to complement and amend ICCAT Inspection Report No. 6770, following the identification of additional elements after the completion of the onboard inspection, based on document cross-checks and analysis of supporting evidence.

Point 11 "Infringements of ICCAT conservation and management measures observed" is amended as follows:

Difference between number declared in the TUR-2026-037-ITD (75 pcs.) and number counted by the inspectors (84), in percentage, was **more than 10 %** (12 %)
(See attachment to ICCAT report related to video analysis of the transfer).

On board of OPV OCEAN SENTINEL, 05.06.2026

Inspector's signatures:

Four handwritten signatures in blue ink, arranged horizontally. The first signature is a stylized, cursive script. The second is a large, bold, stylized letter 'A'. The third is a cursive signature that appears to read 'James'. The fourth is a cursive signature that appears to read 'H. Vuletic'.
