Le présent addendum au COC-305/2026 Appendice 2 contient la réponse à une PNC reçue après la première publication de : l'Égypte.

Esta adenda al COC-305/2026 Apéndice 2 contiene la respuesta a un PNC recibida después de la primera publicación de: Egipto.

Vessel PNC No.	***Request number***	***Date reported***	***Date of PNC***	***CPC***	***PNC***	***In potential contravention of***	***PNC description***	***CPC Response***
1	000EG020	19/05/2026	19/05/2026	Egypt	N/A	N/A	The observer reported that he presented himself at the port to verify and inspect his vessel; however, he noted that the vessel was absent. Consequently, he stated that he is currently on stand-by, staying in accommodation provided by the operator, awaiting the arrival of the two vessels en route to the port of embarkation. No lookbook photos were taken. His request takes effect as of 19 May 2026. Note that the two Egyptian vessels request : 000EG019 & 000EG020 are not present at their respective ports of embarkation.	While sailing toward the Port of Observers' Deployment, two vessels experienced a sudden technical malfunction, causing a delay past their scheduled May 19 arrival while crews worked cooperatively to ensure safety and fix the issue—an incident duly recorded in the vessel's logbook. To prevent such situations from occuring in future seasons and to ensure the timely arrival of the observers, it has been decided, as a precautionary measure, to adopt the Port of Alexandria as the embarkation port for observers in future seasons. This will help minimize the delays and ensure the smooth operation of activities within the scheduled timeframes
