

## Compliance Summary Tables

COC 308C

2016				2017		
CPC	Potential issues of non-compliance-2016	Response / explanation by CPC	Actions taken in 2016	Potential issues of non-compliance-2017	Response / explanation by CPC	Actions taken in 2017
ALBANIA	<b>Annual Reports/Statistics:</b> No Annual Report submitted (Parts 1 and 2). No Task I T1FC fishing fleet form received. No STATS of any kind for 2015 were reported during 2016. Only summary table part 1 submitted late in November.	Albania has restructured duties recently. Next year will be on time.	Letter on reporting issues and lack of response to 2015 COC letter.	<b>Annual Reports/ Statistics:</b> No explanation for "Not applicable" category. Missing fleet characteristics and Task II catch & effort data.	<u>Recommendation 16-14 by ICCAT to Establish Minimum Standards for Fishing Vessel Scientific Observer Program Albania has reported not applicable, but the reason for this is not explained. Explanation: Albania will set those scientific standards as necessary and good contribution to resource management. (Without that standard in Albania, is impossible to give any explanation). Albania will be careful and prepare the Annual reports based on Revised Guidelines.</u>	
	<b>Conservation and Management Measures:</b> No submission of MED-SWO list of authorised vessels and no closure report (Rec. 13-04); Rec. 14-04, paras 19 & 52: late submission of E-BFT catching vessel; late submission of 14-04 implementation report. BCD annual report submitted late, Rec. 11-20.		No reply to 2017 COC letter regarding reporting deficiencies.	<b>Conservation and Management Measures:</b> 16-13. <u>Shark measures implementation check sheet submitted late (at annual meeting).</u> For other by- catch requirements, not applicable, not explained. No information on implementation of turtle by-catch mitigation and general by-catch/discard mitigation.	<u>Regulation 1, Article 7 (3). "It is prohibited using of bottom nets or floating nets for fishing of following species: white tuna (Thunnus alalunga), Blue-fin tuna (Thunnus thynnus), swordfish (Xiphias gladius), and sharks (Hexanchus griseu, Cetorhinus maximus, Alopiidae; Carcharhinidae; Sphyrnidae; Isuridae; Lamnidae)". Check Sheet submitted on 29/09/2017. According the Fishery legislation all fishing vessels are obliged to avoid any incidental catch of turtles, sharks, seabirds, marine mammals, etc. When it happen should take care to free them without damaging and registering, reporting as well.</u>	
	<b>Quotas and catch limits:</b> Compliance tables received late. E-BFT overcatch in 2015.			<b>Quotas and catch limits:</b>		
	<b>Other issues:</b> PNCs under ROP-BFT contained in COC-305. EU informed that no reply to the inspection report (Rec. 14-04, Annex 7) was received.			<b>Other issues:</b>

<b>ANGOLA</b>	<b>Annual Reports/Statistics:</b> Summary table Part 1 and summary table Part II are missing from Annual Report.	In November Angola informed the Secretariat of the following: We have not sent the compliance tables previously as we do not have Angolan vessels for tuna fisheries. Therefore, our catches are considered (0.0). Tuna species in Angola were caught by contracted vessels with foreign flags.	Letter on reporting issues and lack of response to 2015 COC letter.	<b>Annual Reports/ Statistics:</b> Annual report submitted late (but before previous deadline). No explanation for "Not applicable" category. No Fleet characteristics data submitted (ST01).		
	<b>Conservation and Management Measures:</b>			<b>Conservation and Management Measures: Rec. 16-13:</b> No shark measures implementation check sheet submitted. No information on implementation of turtle and seabird by-catch mitigation and general by-catch/discard mitigation (not applicable, not explained). Vessels not included on tropical list but small quantities of tropical tunas reported.		
	<b>Quotas and catch limits:</b> No Compliance tables received			<b>Quotas and catch limits:</b>

<b>BRAZIL</b>	<b>Annual Reports/Statistics:</b> Summary table (section 3) missing from Annual Report; Annual Report summary tables contain several blanks or "N/A" without explanation.		Letter on reporting and retroactive vessel authorization submission. Brazil has replied to the letter.	<b>Annual Reports/Statistics:</b> No annual report received. No statistical data received.	Brazil requested a derogation of the application of the provisions of 11-15 due to very exceptional circumstances <u>outlined in their statement to COC [313]. They will submit a plan to ensure all outstanding data are submitted.</u>	
	<b>Conservation and Management measures:</b> 13-13/14-10 & 14-01/15-01: retroactive registration of "+20m & TROP"-vessels; No N-SWO plan received (Rec. 13-02).	Brazil went through profound restructuring and down sizing of fisheries department. Comitted to not be late in the future.		<b>Conservation and Management measures:</b> <b>Rec. 15-01/16-01:</b> No quarterly reports for bigeye tuna. No tropical tuna management plan. <b>Rec. 16-13:</b> No shark measures implementation check sheet submitted. <b>Rec. 16-03.</b> No N. SWO management plan submitted.		
	<b>Quotas and catch limits:</b>			<b>Quotas and catch limits:</b> No Compliance tables submitted before the deadline.

2016				2017		
<i>CPC</i>	<i>Potential issues of non-compliance-2016</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2016</i>	<i>Potential issues of non-compliance-2017</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2017</i>
<b>CHINA, People's Rep.</b>	<b>Annual Reports/ Statistics:</b>		No action necessary	<b>Annual Reports/ Statistics:</b>	Our understanding is that the request of each CPC wishing to grant access to its ports to foreign fishing vessels shall designate its ports to which foreign fishing vessels may request entry pursuant to this Recommendation is not applicable to China as China is not Atlantic Ocean coastal state. However, from time to time, some carrier vessels carry tuna products caught only by Chinese fishing vessels operating in the ICCAT area entering into Chinese port, in this case, we are not sure such carrier vessels be regarded as foreign fishing vessels. Therefore, it is our understanding that the Rec.12-07 is not applicable to China. Up until now China has no authorized port for BFT landing and/or transshipment. In addition, China implemented the Customs Clearance system for any BFT products entering into Chinese territory, the fishing vessel owner or importer must apply the Customs Clearance Certificate to the Ministry of Agriculture, during this process, the relevant material/information including CDS, transshipment declaration, bill of lading must be showed to China fishery Authority, through this way we can monitor the BFT landing in the Chinese port.	
	<b>Conservation and Management Measures:</b>			<b>Conservation and Management Measures:</b> <b>Rec. 12-07:</b> No list of authorised ports submitted but no specific prohibition of entry by foreign vessels stipulated. <b>Rec. 14-04:</b> No list of authorised BFT ports submitted.		
	<b>Quotas and catch limits:</b> Possible overharvest NSWO.			<b>Quotas and catch limits:</b>		
	<b>Other issues:</b> ROP_transshipment: PNC reports and explanation contained in COC-305. Japan requested information about the species landed under Rec. 12-06. Senegal informed the Secretariat in February 2016 of a port inspection report of October 2015 with apparent infringement (refer to doc. COC_307/16).	Will follow payback rules and make effort to avoid overharvest in future.		<b>Other issues: ROP-transshipment</b> PNCs presented in COC-305/17.

<i>CPC</i>	<i>Potential issues of non-compliance-2016</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2016</i>	<i>Potential issues of non-compliance-2017</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2017</i>
<b>CURAÇAO</b>	<b>Annual Reports/ Statistics:</b> Annual Report Part 1 summary table not submitted; Part 2 summary table contains several blanks or "N/A" without explanation.		Letter on reporting issues. Curaçao has replied to the letter.	<b>Annual Reports/ Statistics:</b> No explanation for "Not applicable" in all cases.		
	<b>Conservation and Management Measures:</b>			<b>Conservation and Management Measures: Rec. 15-05.</b> Answer insufficiently clear to cover requirements. No report on <b>Rec. 16-11.</b>	Curacao is willing to work with other CPs to continue improvement.	
	<b>Quotas and catch limits:</b>					
	<b>Other issues:</b>					

2016				2017		
<i>CPC</i>	<i>Potential issues of non-compliance-2016</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2016</i>	<i>Potential issues of non-compliance-2017</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2017</i>
<b>EGYPT</b>	<b>Annual Reports/ Statistics:</b> No Annual Report submitted (Parts 1 and 2). No Task I T1FC fishing fleet form received (catches were sent).		Letter on reporting issues and lack of response to 2015 COC letter. Egypt has replied to the letter.	<b>Annual Reports/ Statistics:</b> No explanation for "Not applicable" in all cases. No data on sharks or turtles reported. Fleet characteristics (ST01) received late.	As it is prohibited to catch or trade sharks and turtles domestically or internationally, no one case has been reported since ever.	
	<b>Conservation and Management Measures:</b> No BCD annual report submitted, Rec. 11-20; No submission of MED-SWO list of authorised vessels and no closure report (Rec. 13-04); No report on the implementation of Rec. 14-04.			<b>Conservation and Management Measures: Rec. 16-13:</b> shark measures implementation check sheet submitted late. <b>Rec. 16-14.</b> No information on domestic observer programmes for fisheries other than BFT <b>Rec. 10-09:</b> no details on implementation reported. <u>Rec. 16-05: inclusion of swordfish vessels on ICCAT Record in excess of capacity allowed and fishing plan for MED-SWO submitted without quota.</u>	As it is prohibited to catch or trade sharks and turtles domestically or internationally, no one case has been reported since ever, and there is no fishing activity for this species. Unfortunately in 2016/2017 Egypt has faced some problems in the data collection, on the other hand the domestic program is under progress, unfortunately the economic circumstances doesn't support its development. Regarding Rec. 10-09 there is no by-catch for the turtles or seabirds recorded by domestic observers and due to the current economic circumstances and the high expenses, Egypt enforced the ICCAT Recommendation in this regard through the assigned inspectors in ports.	
	<b>Quotas and catch limits:</b> No Compliance tables submitted.			<b>Quotas and catch limits:</b>	<u>Egypt confirmed that despite the vessel listing, no fishing for swordfish had taken place.</u>	
	<b>Other issues:</b>			<b>Other issues:</b> information on implementation of turtle, seabird, by catch and discard measures insufficient to cover the requirements.	There is no by-catch for turtles or seabirds recorded by domestic observers in ports, also Egypt prohibits the catch of turtles and seabirds.

EU	<b>Annual Reports/Statistics:</b> clarification is requested for EU-Denmark, EU-Estonia, EU-Germany, EU-Latvia, EU-Lithuania and EU-Sweden for some historical Task I catches in the last decade (refer to doc. PLE_105/16, Table 2).	EU explained that it referred to by-catches previous to 2015 that were not reported in PLE 105/16.	Letter on BUM/WHM overharvest. EU has replied to the letter.	<b>Annual Reports/Statistics:</b> Reporting on sea turtle and seabird interactions may be incomplete. Some size data missing for other EU member States.	Interaction on Sea turtles: this item is not relevant because in COC 303 the EU is not associated to incomplete submissions, and all EU data is referred in Table 10 of PLE 105. Interaction on Seabirds: as per Rec 11-09, there is no obligation to use mitigation measures north of 25° South, and referred to as on a voluntary basis for the Mediterranean Sea. Statistical data for EU Lithuania and EU Denmark: zero catch in 2016 has been confirmed for both; Rec 11-15 has been completed accordingly. Size data missing: Size data has been submitted for the whole EU, and not by EU-Member State; no non-compliance detected.	
	<b>Conservation and Management Measures: Rec. 14-04, para 52:</b> Retroactive registry (2+months) of 37 EU-GREECE-flagged "E-BFT catching"-vessels, not in accordance with current regulation. BCD annual report submitted late for EU-Portugal, Rec. 11-20. Rec. 13-13, paras 5bis/5tris: missing IRN numbers (IMO or others) for 2 EU-Croatian vessels. No VMS messages from EU-Portugal received in 2016.	EU-Greece sent registration info on time to DG MARE who, due to an IT error, did not receive it on time. EU explained that a new process has been introduced to ensure this doesn't happen again. One Croatian vessel is wooden and does not require IMO number and the IMO number of the other vessel was submitted. EU-Portugal does not send VMS messages because it has no vessel targeting BFT.		<b>Conservation and Management Measures: Rec. 14-04:</b> Implementation report submitted late due to confusion with previous deadline (was submitted before 15 Oct). <b>Rec. 11-20:</b> BCD annual report incomplete - no report for EU-France, EU-Italy and EU-Netherlands. <b>Rec. 16-05, para 28:</b> non-respect of "ALB-Med"-vessel submission deadline (20/07/2017 set by Circular #4454/17) regarding 6 EU-Cyprus vessels and 293 EU-Greece vessels. <b>Rec. 16-11.</b> Previous format of Annual Report received, so no report on implementation of Rec. 16-11, although sailfish included in Task 1. <b>Rec. 15-05,</b> information for EU-Portugal missing. <b>Rec. 16-12.</b> No information included in Annual Report. <b>Rec. 12-07:</b> List of authorised ports have not been submitted for all EU Member States, and no specific prohibition of entry by foreign vessels stipulated for those missing from the list (ports submitted for 8 Member States).	<b>Rec 14-04:</b> Due to administrative reasons, the EU implementation report has been submitted after the 1 <sup>st</sup> October (new deadline in 16-16), but before 15 October (previous deadline); <b>Rec 11-20</b> Reports for EU France, EU Italy and EU Netherlands have been sent to ICCAT, after 16 October; <b>Rec 16-05 § 28:</b> Due to administrative reasons, the SWO Med vessels lists for EU Greece and EU Cyprus have been submitted after the entry into force of Rec 16-05. For the year 2017, this is not contrary to Rec 16-05. <b>Rec 16-11:</b> Due to administrative reasons, the EU has used to the previous format for the Annual report. However, all the requested data has been reported. An addendum on Section III (sailfish) has been sent on 7 November, but the data was initially submitted in Task 1. <b>Rec 15-05:</b> EU Portugal has no vessel targeting BFT, which explains the absence of VMS data. <b>Rec 16-12:</b> The actions to be taken domestically by all EU Member States to monitor catches of blue sharks are detailed in the EU legislation. All EU measures have been reported in the shark check sheets in COC 302. <b>Rec 12-07:</b> The list of designated ports submitted by the EU is valid for the EU as a whole and includes all EU Member States concerned. The list has not been modified in 2017 from previous years.	
	<b>Quotas and catch limits:</b> BUM/WHM overharvest.			<b>Quotas and catch limits:</b> <u>Continued overharvest of WHM.</u>	<u>The overharvest of WHM in 2016 was already expected and addressed at the 2016 Annual meeting. As stated in the response to the 2016 letter of concern, EU Spain (only EU Member State concerned by this overharvest, as by-catch) has closed the fishery for both BUM and WHM in 2017.</u>	
	<b>Other issues:</b> PNCs under ROP-BFT contained in COC-305.			<b>Other issues:</b> <del>Presented under Rec. 08-09, allegations of potential non-compliance by several Tunisian purse seine vessels in June 2017. See document number COC-307/17</del> ROP-BFT PNCs presented in Doc. <b>COC-305/17.</b>

<b>GHANA</b>	<b>Annual Reports/ Statistics:</b> In annual report parts 1, 2, summary tables: several N/As without explanation.		No action necessary.	<b>Annual Reports/ Statistics:</b> No explanation for "Not applicable" category. Task II size data not submitted.	AVDTH protocol as prescribed to Ghana by SCRS-ICCAT cannot estimate the length frequencies in the classical format as requested on the form. All length frequencies for species have been captured in the AVDTH databases which includes yellowfin, skipjack and bigeye and other tuna-like species.	
	<b>Conservation and Management Measures:</b> late submission of statistical document data, Rec. 01-21 & Rec. 01-22.			<b>Conservation and Management Measures:</b> Rec. 16-11. Sailfish catches reported in Task I, but no report on 16-11 made in annual report (reported not applicable).	Education of crew onboard have been ongoing since 2012 with seminars and training workshops being held by ISSF/AZTI officials in Ghana code named "Skippers workshops". Methods and types of FADs to use and release strategies for endangered species have been shown and illustrated to the industry. Skippers and crew are well aware of steps to reduce the entanglement and destruction of species which are endangered and becoming extinct. This initiative from ISSF will continue in subsequent years.

<b>GUINEA Rep.</b>	<b>Annual Reports/ Statistics:</b> No Annual Report submitted (Parts 1 and 2).	Since 2015, the Republic of Guinea did not issue any tuna fishing licenses for vessels flying a Guinean flag. Moreover, within the framework of the EU fishing agreements, there have been no cases. Thus, no tuna statistics are available between 2015 and 2016. The reasons to explain the absence of tuna fishing vessels flying Guinean flag are explained in the 2015 Annual Report of the Republic of Guinea. On the other hand, it should be noted that Guinea issued three fishing licenses to vessels flying a Senegalese flag: Granada, Western Kim, Solevant. These vessels do not land their catches in Guinea.	Letter on reporting issues. <u>Reply to 2017</u> COC letter regarding reporting deficiencies <u>received late (during meeting)</u> .	<b>Annual Reports/ Statistics:</b> No annual report received; no statistical data received.	Between 2013 and 2016, the Republic of Guinea was included by the European Union in the list of non-cooperating third countries in the fight against IUU fishing. During this period, many measures were taken whose implementation has required reorganization of the structures involved in data provision and processing. In addition, there is currently no vessel flying the Guinean flag targeting tuna and tuna-like species monitored by ICCAT. However, some individuals are landed at the different artisanal fishing ports. Moreover, administrative staff mobility, limited human capacities and difficulties in monitoring artisanal fishing activities, have not favoured the collection, processing and submission of information and data. Guinea requests an extension of the deadline for submission of this information and data until the end of the 1st semester 2018 and in that time, Guinea would like technical assistance in this area.

<b>MOROCCO</b>	<b>Annual Reports/ Statistics:</b>		No action necessary.	<b>Annual Reports/ Statistics:</b>		
	<b>Conservation and Management:</b> Rec. 13-13, paras 5bis/5tris: missing INR numbers (IMOs or others) for 30 vessels.	Morocco transmitted its response to the ICCAT Secretariat stating that among the aforementioned 30 vessels only 6 must have an IMO No. These vessels are inactive since 2012. The other 24 vessels include wooden vessels (WOD) and/or are made of steel, however with a GRT which is less than 100 t (JUS). These 24 vessels are reported to the Secretariat in accordance with ICCAT regulations in force.		<b>Conservation and Management:</b>		
	<b>Quotas and catch limits:</b>			<b>Quotas and catch limits:</b>		
	<b>Other issues:</b> PNCs under ROP-BFT contained in COC-305.	Morocco sent its response to the ICCAT Secretariat on 29/09/2016 indicating that this operation was repeated in accordance with the provisions of Article 76 and Annex 8 of Rec. 14-04. Thereafter, the counting and estimation of the fish was carried out successfully as there was a video recording with better quality allowing the observer to sign the ITD.		<b>Other issues:</b> ROP-BFT PNCs presented in Doc. COC-305/17.	Response in COC-305. Following a remark of the ICCAT observer mentioned in COC-305 Report, Annex 2 concerning Morocco: Bluefin tuna is caged without authorisation number/transfer operation 12 with the same AUT number as transfer number 13.I would like to inform you that this does not refer to a missing caging authorisation number, as the caging authorisation exists and it is authentic and the number is correct. It is the transfer authorization of another catch that includes a numbering error. To this effect, it should be noted that two authorizations are authentic and include entirely different real data, which demonstrates that there is an involuntary error in the transfer authorization number.

<b>ST.VINCENT &amp; THE GRENADINES</b>	<b>Annual Reports/ Statistics:</b> Annual Report received late (at Annual meeting).	SVG committed to send it on time next year.	Letter on continued reporting issues, no N SWO development/management plan, and lack of response to 2015 letter. Reply to 2017 COC letter regarding reporting deficiencies received late, during meeting.	<b>Annual Reports/ Statistics:</b> Annual report submitted late (but before previous deadline). No information from domestic observer programmes as still being established, No plan for improving shark data collection/ interaction with turtles, mitigation of by-catch/discards. <u>Annual Report indicates implementation of ICCAT requirements on high seas but is unclear on implementation in SVG waters.</u>		
	<b>Conservation and Management Measures:</b> No N-SWO plan received (Rec. 13-02).	Has been sent to Secretariat on 18 November 2016.		<b>Conservation and Management Measures:</b> N.SWO Management plan submitted late. <b>Rec. 16-13:</b> Shark measures implementation check sheet submitted late. Sailfish catches reported in Task I, but no report on <b>Rec. 16-11</b> made in Annual Report (reported not applicable). <b>Rec. 16-01.</b> Tropical tuna management plan submitted late. Responses to <b>Recs. 15-05 and 16-11</b> may be insufficient to meet the requirements. <b>Rec. 12-06:</b> Transshipment report submitted late.		
	<b>Quotas and catch limits:</b> Compliance tables received late. Overharvest N-ALB.	Stated that it would rectify in 2016 using pay-back system.		<b>Quotas and catch limits:</b> <del>Adjusted quota for N-ALB and N-SWO for 2016 and 2017 might need some revision or explanation.</del>		
	<b>Other issues:</b> PNCs reported under transshipment programmes contained in COC-305.			<b>Other issues:</b> ROP-transshipment PNCs presented in COC-305/17.

<b>SYRIA</b>	<b>Annual Reports/ Statistics:</b> No annual report submitted (Parts 1 and 2). No Task 1 T1FC fishing fleet form received (catches were sent).	Syria was not present at the meeting. In a message to the Secretariat it explained that fishing in Syria is traditional, and vessels traditionally operate in territorial water and not equipped to target tuna species. Only one vessel equipped to participate in BFT fishing activities (Fesal) which used to catch Syrian quota previously. Syrian quotas of BFT transferred, and no landing of BFT. Most requirements in Part I are not applicable in Syria (farming , landing, tuna caging, tuna traps, etc.).	Letter on continued reporting issues, no VMS messages. No reply to 2017 COC letter regarding reporting deficiencies.	<b>Annual Reports/ Statistics:</b> Annual report submitted late (but before previous deadline). No fleet characteristics (ST01) received.		
	<b>Conservation and Management Measures:</b> No submission of MED-SWO list of authorised vessels (Rec. 13-04) and no closure report (Rec. 13-04); Late submission of 14-04 implementation report. No VMS messages received in 2016.			<b>Conservation and Management Measures: Rec. 16-13:</b> No shark measures implementation check sheet submitted. <b>Rec. 14-04</b> Implementation report received slightly late (but before previous deadline). No monthly BFT catch report received.		
	<b>Quotas and catch limits:</b>			<b>Quotas and catch limits:</b>		
	<b>Other issues:</b> PNCs under ROP-BFT contained in COC-305.			<b>Other issues:</b> ROP-BFT PNCs presented in Doc. COC-305/17.

<b>TUNISIA</b>	<b>Annual Reports/ Statistics:</b> In Annual Report parts 1 and 2 summary tables, several blanks and N/As without explanation.		Letter on reporting issues. Tunisia has replied to the letter.	<b>Annual Reports/ Statistics:</b>		
	<b>Conservation and Management Measures:</b> No submission of MED-SWO list of authorised vessels (Rec. 13-04). Rec. 13-13, paras 5bis/5tris: missing IRN number (IMO or other) for 1 vessel.			<b>Conservation and Management Measures:</b>		
	<b>Quotas and catch limits:</b> Compliance tables received late.	The missing IMO number is due to the change of ownership of the vessel: it will be submitted.		<b>Quotas and catch limits:</b>	Please see Addendum1 to Annex 3 of COC-303 and Addendum 1 to Annex 1 of COC-307 for allegations and responses.	
	<b>Other issues:</b> PNCs under ROP-BFT contained in COC-305. EU requested some explanations about 3 inspection reports under Annex 7 of Rec. 14-04.			<b>Other issues:</b> Received, in application of Rec. 08-09, a report from the European Union (EU) on potential non compliance by several Tunisian purse seine vessels in June 2017 and replied to the initial information submitted by the EU (refer to Doc. COC-307/17); <b>ROP-BFT</b> PNCs presented in Doc. COC-305/17.

TURKEY	<b>Annual Reports/ Statistics:</b>	<p>1. We confirm that the authorized list of SWO-Med vessels submitted late (on 26 January 2016, with 11 days delay). A clarification was sent to the Secretariat (on 28 January) that indicates the fact that the inadvertent delay occurred in submitting the required data/information was caused by technical issues arising from the recent updating and integration works on Ministry's web-based information system. Correspondingly, vessel registrations made by Ministry's provincial directorates from different regions – including vessels those targeting Med-SWO – have sporadically been interrupted due to the said process of renovation and integration works at the system (Turkish fishery information system.) Since acquiring the data on registered vessels from regions retarded temporarily, by extension, processing and submitting these data to ICCAT had to delay as well. Necessary measures have been taken to avoid repetition of similar inconveniences. 2. Timely reporting and recording of authorized BFT Catching and Other Vessels has been made. Total number of BFT Other Vessels has been 32 in 2016. Regarding this exceptional case, we fully aware of the 15 days requirement for notification, in the first place. Our authority received an "extension of E-BFT Other vessel authorization" request from an operator. Questioning its appropriateness, and considering that the vessel in question is an already authorized vessel having no previous record of illegal fishing, and also since the vessel has no IUU fishing potential or a capacity to catch tuna, the request was conveyed to the Secretariat, as it was regarded that the operator unintentionally failed to notice informing our authority of the expired extension, for only once. Then the secretariat notified that the requested updates to the authorization was made, indicating that the issue was reported to the COC.</p> <p>The operation has been instructed to take much care of the required procedures, and necessary administrative measures have been taken to avoid repetition of similar incidents. 3. We confirm that the 1st April deadline for submission was missed one week since the required trade data could not be acquired in good time. Necessary administrative measures have been taken by our authority.</p>	Letter on vessel submissions. Turkey replied to the letter explaining a technical issue that entailed some exceptional delay in the submission.	<b>Annual Reports/ Statistics:</b> Task II catch and effort data could not be processed.		
	<b>Conservation and Management Measures:</b> 1.) Late submission of SWO-Med vessels, Rec. 13-04; 2.) Submission of a "E-BFT other"-vessel not in accordance with Rec. 14-04, para 52; 3.) Late submission of statistical document data, Rec. 01-21 & Rec. 01-22.			<b>Conservation and Management Measures:</b>		
	<b>Quotas and catch limits:</b>			<b>Quotas and catch limits:</b>		
	<b>Other issues:</b> PNCs under ROP-BFT contained in COC-305.	Investigation of the reported PNCs been made through a detailed examination of the related footages, information and documents. Results have been reported and shared with the related parties in a timely and transparent manner. Findings of the regional observer (ROP-BFT) missions and on-site inspections have indicated no irregularities and inconsistencies about the declared number and weight of fish transferred to cages (i.e, no unreported fish or fish exceeding the declared quantity were detected, etc.).		<b>Other issues:</b> ROP-BFT PNCs presented in Doc. COC-305/17. Has presented possible IUU activities by two EU-Greece vessels, as reported in the draft IUU list.

<i>CPC</i>	<i>Potential issues of non-compliance-2016</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2016</i>	<i>Potential issues of non-compliance-2017</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2017</i>
<b>UNITED KINGDOM (OTs)</b>	<b>Annual Reports/ Statistics:</b> the Annual Report contains several dates referring to 2014 and 2015.		Letter on reporting issues. UK-OT has replied to the letter.	<b>Annual Reports/Statistics:</b> Part II Annual Report and BCD annual report submitted late (but within previous deadline). Difficulties in implementing domestic observer programmes reported. No Plan for improving data collection for sharks on a species specific level yet.	UKOT have indicated that some of their territories could not report in a timely manner due to the extensive hurricane damage. Some data from UKOT (Bermuda) received late due to communication problems. Original mail sent July but not received at Secretariat. Annual Reports/Statistics: Part II Annual Report and BCD annual report submitted within the given deadline. Unfortunately errors were identified and so the reports were resubmitted with amendments on 12 October, which was within the deadline for submission of documents for consideration at the Annual Meeting;- Difficulties in implementing domestic observer programmes reported: The majority of tuna catch in the UKOTs is taken in the St Helena fishery. A domestic observer programme has now been implemented in St Helena, with 7% observer coverage achieved in 2016. The programme has continued in 2017 and will be maintained for 2018. The small catches on Bermuda are taken by small inshore vessels scattered around the island, making both observer coverage and data collection very difficult but we will seek to make improvements on our reporting. - No Plan for improving data collection for sharks on a species specific level submitted: The catch of sharks in the UKOTs is very small. In St Helena, a single shark was caught in 2016, and in Bermuda, the majority of captured sharks were released alive. St Helena started a conventional tagging programme in late 2015, and during 2016 a total of 537 yellowfin and 65 skipjack were double tagged, in accordance with ICCAT protocols. Data from the tagging programme is submitted to ICCAT on a regular basis. No list of designated ports or contact points submitted: The UKOTs have limited port facilities and are rarely visited by foreign fishing vessels, hence no ports have been designated under Recommendation 12-07. The UKOTs will review this obligation and if necessary submit the relevant information by the end of the year.	
	<b>Conservation and Management Measures:</b> No BCD Annual Report submitted, Rec. 11-20.			<b>Conservation and Management Measures:</b> Rec. 12-07. No list of designated ports or contact points submitted.		
	<b>Quotas and catch limits:</b> Compliance tables received late.			<b>Quotas and catch limits:</b>
