*NAMIBIA: Kindly note that we do not really have size composition data for SWO, due to limited sampling by on-board observers and this is one area we really require assistance from ICCAT to come up with sampling manuals for Large Pelagic species, namely SWO and Sharks. Consequently, we are unable to give you a proper estimate of our undersized SWO catches at the moment. However, information obtained from our Fisheries Inspectors located at the landing sites shows that we have virtually not landed undersized SWO during 2016.

*NAMIBIE : Veuillez noter que la Namibie ne dispose pas de données de composition par taille pour l'espadon, en raison de l'échantillonnage limité réalisé par les observateurs à bord et car il s'agit d'un domaine pour lequel nous sollicitons l'assistance de l'ICCAT afin d'obtenir des manuels d'échantillonnage des espèces de grands pélagiques, notamment l'espadon et les requins. Par conséquent, nous n'avons pas pu réaliser d'estimation adéquate de nos prises d'espadon sous-taille pour l'instant. Néanmoins, selon les informations de nos inspecteurs des pêches détachés aux points de débarquement, les débarquements d'espadon sous-taille étaient pratiquement nuls en 2016.

NAMIBIA: Constaté que Namibia no tiene datos de composición por talla para pez espada debido al muestreo limitado de los observadores a bordo y este es un campo en el que realmente requiere la asistencia de ICCAT para conseguir manuales de muestreo de especies de grandes pelágicos, a saber pez espada y tiburones. Por consiguiente no hemos podido realizar una estimación adecuada de las capturas de pez espada de talla pequeña en este momento. Sin embargo, la información obtenida de nuestros inspectores pesqueros asignados a los puntos de desembarque muestra que apenas hubo desembarques de pez espada de talla inferior a la regulada en 2016.

The underharvest of the EU in 2016 is of 1625.07, which corresponds to more than 15% of its quota. In line with Rec 16-03 the EU can only carry over 15% of its quota in 2017 (i.e. <u>1007.7 t</u>). For the years 2014, 2015 and 2016 the adjusted limit is calculated by taking into account the transfers to Canada (470, 450 and 295 t from EU-Spain) and of 50 and 40 t S. Pierre et Miquelon as provided for in Rec 13-02. For 2017 the adjusted limit is calculated by taking into account the transfers to Canada (300 t from EU-Spain) and of 40 t to S.
