3	ANGOLA					Not applicable, has not been assigned a limit		
4	BARBADOS	Y	Y	No 13.5 t total for all fisheries (LL and Handline). Barbados Fisheries Division is working with longline fishers to promote the use of non-offset circle hooks to reduce mortality of marlins.	No 17.5 t total for all fisheries LL and Handline. Barbados Fisheries Division is working with longline fishers to promote the use of non-offset circle hooks to reduce mortality of marlins.	In concert with the use of non-offset circle hooks fishers will be instructed in the best practises for safely extricating these animals from longline gear to reduce injuring and increasing the animal's survival without endangering the fishers.	No. Barbados places all landed marlins in the market for sale as food	No. Fishers will be instructed in the best practises for safely extricating these animals from longline gear to reduce injuring and increasing the animal's survival without endangering the fishers.
5	BELIZE	Y	Y	Yes. There were NO catches of marlin from our high seas operation in 2018. Our artisanal vessels do not target marlin. However, there are catches of marlin taken during recreational fishing and sport fishing tournaments. While the recreational fishery has a 'catch and release' policy, sport fishers retain their largest catch to be measured and weighed as a part of the tournament which is managed by the Belize Game Fisheries Association. Recreational and sport fishing in Belize is regulated by the Coastal Zone Management Authority and Institute.	Yes. There were NO catches of marlin or spearfish from our high seas operation in 2018. Our artisanal vessels do not target marlin/spearfish. However, catches of marlin during sport fishing tournaments are caught and released and only retained if the fish was dead when brought alongside the vessel. Sport fishing in Belize falls under the purview of the Coastal Zone Management Authority and Institute (CZMAI) which does not currently have a data collection program in place. The Belize High Seas Fisheries Unit has begun collaboration with the CZMAI and the Belize Game Fishers Association to start collecting the requisite	Not applicable, has not been assigned a limit	Yes. There is no expressed provision to prohibit dead discards of Blue Marlin and White Marlin/Spearfish that are caught in high seas fishing operations; however, these catches must be reported to the BHSFU in the normal catch reporting spreadsheet and entered into the fishing logbook. There are no restrictions for these products to be entered into commerce except for standard certification processes.	Yes. The domestic regulation governing interaction with Blue Marlins and White Marlins/Spearfish requires vessel owners to ensure that any incidental harvesting of these species that are alive at the time of harvesting are released in a manner that maximizes their survival.

6	BRAZIL					Not applicable, has not been assigned a limit		
7	CABO VERDE					Not applicable, has not been assigned a limit		
8	CANADA	Y	Y	Yes. There are no directed marlin fisheries in Canadian waters. The only retention of marlin is through pelagic longline by-catch, with the requirement of mandatory release of all live marlin as per licence conditions. Certified Dockside Monitors must be present for off-loading, which insures 100% coverage. Log record data must be submitted by each fisherman to the Monitoring Company that inputs the data into centralized database prior to further fishing trips. At-sea observers are targeted for deployment on 10% of pelagic longline fishing trips, despite no ICCAT requirements for observer's onboard swordfish vessels smaller than 20 meters. All marlin by-catch interactions are reported annually in the estimation of nominal catch (Task I and Catch & Effort (Task II). All data submitted 31/07/2019. In 2018, Canada did not land Blue Marlin in 2018.	Yes. There are no directed marlin fisheries in Canadian waters. The only retention of marlin is through pelagic longline by-catch, with the requirement of mandatory release of all live marlin as per licence conditions. Certified Dockside Monitors must be present for off-loading, which insures 100% coverage. Log record data must be submitted by each fisherman to the Monitoring Company that inputs the data into centralized database prior to further fishing trips. At-sea observers are targeted for deployment on 10% of pelagic longline fishing trips, despite no ICCAT requirements for observer's on board swordfish vessels smaller than 20 meters. All marlin by-catch interactions are reported annually in the estimation of nominal catch (Task I and Catch & Effort (Task II). All data submitted 31/07/2019. In 2018, Canada landed 1,334 kg of White Marlin.	Yes. There are no directed marlin/spearfish fisheries in Canadian waters. The only retention of marlins is through by-catch, with the release of live marlins being required as per licence conditions forthwith to the place from which it was taken in a manner that causes it the least harm. Dockside Monitors must be present for off-loading of all fisheries that can retain marlins/spearfish and log record data must be submitted by each fisherman to the Monitoring Company that inputs the data into centralized database prior to further fishing trips. Log records from trips with catch must be received from fishermen before they can proceed with their next fishing trip, which insures 100% coverage.	No. Canada does not prohibit dead discarding.	Yes. The pelagic longline fishery has licence conditions for mandatory use of circle hooks, which aim to reduce non-target species by-catch rates and to increase the probability of post release survival. Additionally, all live Marlin are to be released forthwith to the place from which it was taken in a manner that causes it the least harm. Lastly, the fishery is collaborating with DFO in a research program examining patterns of by-catch in the pelagic longline fishery, with a view to mitigating by-catch.
9	CHINA, People's Rep. Of	Y	Y	Yes. Circular issued by General Office of Ministry of Agriculture and Rural Affairs on further strictly complying with conservation and management measures adopted by tuna-RFMOs. Para 3 catch limit: each tuna company and fishing vessel must fish within the catch limit and not allow to fish beyond catch limit or fish without quota.	Yes. Circular issued by General Office of Ministry of Agriculture and Rural Affairs on further strictly complying with conservation and management measures adopted by tuna-RFMOs. Para 3 catch limit: each tuna company and fishing vessel must fish within the catch limit and not allow to fish beyond catch limit or fish without quota.	Yes. The observer on board the fishing vessel will help monitor vessel to comply with the measures. Besides, each year we hold training course and capacity-building activities for the vessel captain to comply with measure, raising their compliance awareness.	No (no explanation)	Yes. We encourage fishing vessels operating on the high seas of Atlantic Oceans to use circle hook to reduce harm to sailfish and spearfish.

BILLFISH CHECKSHEET

11	CURAÇAO	Y	Y	Yes. A total of 42 tons of Blue Marlin has been caught in commercial fishing of which 2.3 ton were dead. The rest of the 42 tons were released alive. In recreational fishing, in none of the local tournaments any blue marlin has been landed. For competition purposes they were all tagged and released. With respect to artisanal fishing we are in the process to formulate a TOR to initiate with a data collection on catches in general and eventual blue marlin catches.	Yes. One white marlin with the weight of 36 kilo has been caught in commercial fishing, death on board, retained and landed. In recreational fishing, in none of the local tournaments any white marlin has been landed. For competition purposes they were all tagged and released. With respect to artisanal fishing we are in the process to formulate a TOR to initiate with a data collection on catches in general and eventual white marlin catches.	Not applicable, has not been assigned a limit	No. Curacao did not reach or approach its landing limits. Though, all dead marlins are landed, and distributed among local crew for their own consumption.	Yes. Currently works are being performed on best practices principles. Guidelines to minimize post release of bycatches and in particular marlins will be developed.
