ALBANIA	Annual Reports/ Statistics: Part 1 of Annual Report received late and Part II slightly late. Statistical data reported late; no national scientific observer programme data received (ST09).	Late reporting due to reporting of historical data; were trying to report all outstanding data and information and submit complete report. Only one purse seiner fishing for ICCAT species, so no national observer programme yet in place, although ROP is deployed.	Letter on reporting issues and implementation of domestic scientific observer requirements, while noting improvement in reporting.	Annual Reports/ Statistics: Statistical data received late.		
	Conservation and Management Measures: Rec. 16-14: Not yet implemented, but actions currently being taken to implement in 2019. Rec. 16-13: No legally binding measures taken to implement shark requirements.	Albanian legislation has transposed the EU regulation Have difficulties providing data on species for which there is no catch or no authorisation. More species have been added to the legislation. Albania will send English version of Albanian legislation to show that all ICCAT Recommendations are applied.		Conservation and Management Measures: Turtle handling guidelines submitted (in Albanian) but unclear if implementation of paragraphs 1 and 2 of turtle measures is complete i.e. legally binding.

CPC	Potential issues of non-compliance-2018	Response / explanation by CPC	Actions taken in 2018	Potential issues of non-compliance-2019	Response / explanation by CPC	Actions taken in 2019
ALGERIA	Annual Reports/ Statistics: No national scientific observer programme data (ST09) received.	SWO vessels are between 4-9 metres, no space for observers, alternative measures taken through port inspection in 43 ports equipped with coast guard services for inspection. Established a system for data collection. BFT purse seiners have national inspectors on board the vessels. With regard to Recommendation 13-11, sea turtles taken as by catch mainly by longliners (by trawlers to some extent) are systematically released live into the water, making sure that they are in perfect conditions so as to prevent vulnerability and exposure to predators. Turtles hauled on board as by-catch of trawlers, are untangled and released live into the water. We have a list of authorised sharks which may be landed - only three species. There is no finning, and no domestic consumption of sharks. Algeria is currently making new regulations to cover all the requirements of the RFMOs, including ICCAT. Collecting logbook information to this end.	Letter on implementation of ICCAT requirements on domestic scientific observers, turtles, sharks.	Annual Reports/ Statistics: Rec. 16-14: No national scientific observers deployed. No Task II data	Observer coverage for tuna purse seiners is 100%. The administration controllers, all of whom are fisheries engineers, are capable of carrying out the tasks stipulated in the recommendation. For longline fisheries with a length less than 15 m (the segment with the highest number of vessels is between 4.80 and 9m), without a pontoon, with little space to embark in addition 4 crew members and equipment and an observer (onboard safety issue). Algeria has resorted to an alternative measure. Information collection has been possible through implementation of an awareness programme aimed at fisheries professionals and intervention by fisheries inspectors at landing points.	
	Conservation and Management Measures: Rec. 13-11: Unclear from report if safe handling practices are being implemented. Rec. 16-13: No legally binding measure to implement general measure. No legally binding measures for species specific prohibitions.			Conservation and Management Measures: Rec. 10-09/13-11: It is unclear if mandatory measures were implemented to reduce by-catch and safe handling of turtles; Rec. 11-10: No information on progress concerning the reduction of by-catch and discards.	See response to 2018 letter contained in COC-309. In addition to our responses related to compliance issues for Algeria, it should be recalled that within the context of mitigation of sea turtle by-catch, a circular note was sent to all decentralized fisheries services and representatives of the profession regarding compliance. Coastguards, as the maritime police, also received this note for compliance on the field. A copy of this note is attached to this response. It should be noted that regarding participation in SCRS work, in particular data collection and compliance with paragraph 3 of Recommendation 11-10, Algeria presented at the 2016 Intersessional Meeting of the Sharks Species Group, a paper with reference SCRS/2016/186, on identification of shark species existing in Algeria "Preliminary inventory of sharks species found in Algerian waters".

ANGOLA	Annual Reports/ Statistics: Part 1 Annual Report submitted late. No size data received due to lack of sampling programme. No national scientific observer programme data (ST09) received.	Angola has indicated lack of resources to implement a domestic observer programme and indicated intention to request assistance from ICCAT. For turtles and seabirds, Angola is currently trying to collect historical data.	Letter on reporting issues, no list of designated ports (Rec. 12-07), implementation of ICCAT requirements on domestic scientific observers and bycatch species, and lack of response to 2017 COC letter.	Annual Reports/ Statistics: Annual Report submitted late (14 November). No Task II data received. Rec. 16-14: No ST11 or ST09 (scientific observer information/data). No T1 fleet characteristics.		
	Conservation and Management Measures: Rec. 16-13: No shark implementation check sheet. Rec. 17-08: No response to request for N. SMA catches; Rec. 16-14: no domestic observer programme. Recs 13-11, 11-09, 11-10 - no data currently available for bycatch species. Rec. 16-01: Vessel not authorised for Tropical Species. No quarterly reports of BET tuna in 2017. Rec. 12-07: No list designated ports.			Conservation and Management Measures: Rec. 18-05: No billfish check sheet received; Rec. 18-06: No updated shark check sheet received; Rec. 16-01: Quarterly reports of BET catches in 2018 and 2019 not submitted. Rec. 12-07/18-09: No authorized lists of ports. Rec. 14-07: No submissions of requirements regarding access agreements.		
	Quotas and catch limits: Compliance tables submitted late.			Quotas and catch limits: No compliance tables received.		
	Other issues:			Other issues: No reply to COC Chair letter

CPC	Potential issues of non-compliance-2018	Response / explanation by CPC	Actions taken in 2018	Potential issues of non-compliance-2019	Response / explanation by CPC	Actions taken in 2019
BARBADOS	Annual Reports/ Statistics: No national scientific observer programme data (ST09) received.	Barbados indicate that this requirement is not applicable, as Barbados lodged an objection to Rec. 10-10.	Letter on reporting issues; no designation of ports under Rec. 12-07; possible blue marlin overharvest; non-submission of validation seals/signatures for ICCAT statistical documents; implementation of ICCAT requirements on turtles, marlin, sailfish, sharks.	Annual Reports/ Statistics: Rec. 16-14: No observer programme yet in place so no data / information submitted		
	Conservation and Management Measures: Rec. 16-01: Quarterly BET catches submitted late. Rec. 12-07: Not clear from report if foreign vessel access to Barbados' ports is prohibited generally. Rec. 02-21/22 No validation seals/signatures for SDs submitted. Rec. 10-09: no information on sea turtle mitigation measures. Rec. 15-05 and 16-11: response incomplete: Rec. 17-08 no report of SMA catches for first semester of 2018. Rec. 16-13 No legally binding measures for the implementation	Rec. 16-01: Some procedural adjustments had to be made to facilitate this additional level of reporting. Rec. 10-09 The Fisheries Division is collaborating with the Barbados Sea Turtle project in a programme to advise fishers on best practises to reduce turtle bycatch, the introduction of circle hooks has already been noted, and to reduce turtle mortality due to accidental entanglements in fishing gear.		Conservation and Management Measures: Full implemenation of turtle measures unclear (e.g. whether best handling practices are obligatory). Rec. 18-09: Unclear if entry of foreign fishing vessels is prohibited generally or on a case by case basis.	See response to 2019 letter contained in COC-309.	
	Quotas and catch limits: Overharvest of BUM according to Task I data, but no compliance table submitted for BUM.			Quotas and catch limits: Continued overharvest of BUM. Overharvest of WHM in 2018.

BELIZE	Annual Reports/ Statistics: Statistics may be incomplete as unclear as to whether catches in EEZ/artisinal fisheries are included.	The artisanal fleet which operates in our EEZ does not target tuna and tuna like species regulated by ICCAT and as such no data has been included in our submitted reports. However, while a small quantity of billfishes are taken during sportfishing and game fishing events and activities these are not reported or recorded and as such no data are available. However, the authority responsible for these events and activities are currently working with our gaming associations within Belize to formalize a data report and recording system for sport fishing catches.	Letter on implementation of ICCAT requirements in waters under Belize's national jurisdiction.	Annual Reports/ Statistics: Unclear from Annual Report if Belize is implementing ICCAT requirements in a binding manner for vessels fishing in Belize's national waters. Rec. 16-14: not clear that minimum % observer coverage being met.		
				Conservation and management measures: Rec. 13-13/14-10 Vessel reported for inclusion on ICCAT Record more than 45 days retroactively.

<i>CPC</i>	<i>Potential issues of non-compliance-2018</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2018</i>	<i>Potential issues of non-compliance-2019</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2019</i>
BRAZIL	Annual Reports/Statistics: No national scientific observer programme data (ST09) received.	Response to Chair's letter was sent by regular mail within the deadline, but was not received by the Secretariat until 16 October. Data reporting deficiencies have been rectified and research programme re-initiated, so observers now deployed and data will be sent next year. Information on vessels was not received in time by the Federal Government from some States and Brazil is working to rectify this. Brazil did not believe it necessary to take legally binding measures regarding species not found in their fisheries but can be rectified if required. Do have normative measures for species found in their fisheries.	Letter on recurring retroactive vessel authorization issues and implementation of ICCAT requirements on domestic scientific observers, while noting positively information provided by Brazil on steps being taken to address these issues, as well as noting improvements this year in its catch data submission and appreciation of information on steps being taken to ensure continued timely submission of data.	Annual Reports/ Statistics: Rec. 16-14: Unclear if scientific observer coverage levels are as yet in line with requirements. ST09 received late	Brazilian scientific observer program was restarted in 2018, with a level of coverage of less than the 5% required on boats that do not pose an extraordinary safety concern. In order to increase coverage, electronic monitoring system will need ICCAT funds to support the implementation of scientific observer programs, particularly regarding guidance on electronic monitoring systems.	
	Conservation and Management measures: Rec. 13-13 / 14-10: Vessels reported for inclusion on the ICCAT Record more than 45 days retroactively. Rec. 16-13: Unclear if legally binding measure is taken for some shark species.			Conservation and Management Measures: Rec. 18-05: Billfish check sheet received late. Rec. 16-01: Some quarterly BET catches received late.		
	Quotas and catch limits: Compliance tables submitted late.			Quotas and catch limits: Size limits not completed on compliance tables.

CABO VERDE	Annual Reports/ Statistics: Part 1 of Annual Report received late. Fleet capacity submitted late; No national scientific observer programme data (ST09) received.	A problem arose due to changes in personnel and designation of replacement late. Cabo Verde has problems with resources for implementing observer programmes and requests assistance from ICCAT.	Letter on reporting issues, no port inspection reports, implementation requirement of domestic scientific observers and billfish, and requesting more detailed reporting on shark and turtle measures in 2019 annual report consistent with information provided at 2018 Annual meeting.	Annual Reports/ Statistics: Annual report received late (9 Oct). Rec. 16-14. No ST11 or ST09 (observer programme information / data) received. No T1 fleet characteristics.		
	Conservation and Management Measures: Rec. 16-01. BET quarterly catch reports for 2017 not reported for last three quarters. Rec. 17-08: No response to request for N. SMA catches. Rec. 16-15: Responses to requirements unclear / may be insufficient. Rec. 12-07: Copies of port inspection reports not received, although designated ports on ICCAT Record. Recs 15-05 and 16-11; response insufficient - legislation is required. Rec. 16-12 - response insufficient, no measures taken but are required: Rec. 10-09 - no measures taken to release turtles unharmed. Rec. 16-13: No legally binding measures for sharks.	Total ban on turtle catches and have instructed foreign flag vessels to avoid turtle by-catch; catches of nine of the species of sharks, found in Cabo Verde's waters are prohibited. Regulatory measures in place including ban on shark species.		Conservation and Management Measures: Rec. 16-01: Third and fourth quarterly catch reports combined for 2018, but no information reported for 2019; Rec. 18-05: Late submission of billfish check sheets; Rec. 18-06: Late submission of shark check sheets; Rec. 14-07: No submission of access agreement requirements.

EL SALVADOR	Annual Reports/ Statistics: Annual report received late. Task 1 submitted late. No ST11 (ObPrgsInf) submitted.	Some delays this year due to personnel problems.	Letter on reporting issues, implementation of requirements on billfish and sharks.	Annual Reports/ Statistics: Annual report received late. Some statistical Task II data received late.	A written response was received in advance from El Salvador: As regards this issue, I would like to inform you that since June 2019 a new democratically elected Government, took office. Last August, I was appointed Director of Fisheries and a series of cases of non-compliance concerning different international bodies were observed. This legacy was left to us by the public officials of the previous administration. The best efforts are being made to update the submittal of information to ICCAT corresponding to 2018, and we commit to reply within the established deadline included in the Chair’s letter of concern that we received a few days ago.	
	Conservation and Management Measures: Rec. 16-13: No shark measures implementation check sheet submitted. No list of foreign vessel authorised ports/contact points binding.	All by-catches of marlins discarded. For sharks, El Salvador will send more details on the relevant binding measures in their legislation.		Conservation and Management Measures: Rec. 16-15: transshipment report received late: Rec. 01-21 and 01-22: SDP data received late: Rec. 06-13: Trade data received late: Recs 10-09/13-11: Unclear if measures are fully implemented / legally binding. Rec. 18-05 and 18-06: No billfish check sheet or updated shark check sheet received.		
	Quotas and catch limits:			Quotas and catch limits: Compliance tables received late.

2018				2019		
CPC	Potential issues of non-compliance-2018	Response / explanation by CPC	Actions taken in 2018	Potential issues of non-compliance-2019	Response / explanation by CPC	Actions taken in 2019
EU	Annual Reports/Statistics: A few statistical data received late (Task I, Bulgaria, Germany, Ireland, Latvia, Lithuania).	These Task I data concern EU Member States that do not play a major role in ICCAT fisheries. In all cases the quantities involved are very small and of minor importance. The late submission is due to administrative problems coupled with the summer holidays period. All the EU Task I data for the major EU Member States have been submitted on time.	Letter on reporting issues, eastern bluefin issues currently under investigation in EU.	Annual Reports/Statistics: Some statistical data received late (see PLE-105).		
	Conservation and Management Measures: Rec. 16-05: Late submission of SWO-MED vessel list for EU-Croatia. Rec. 17-07: Deadline of one week for caging declarations often not respected. Some caging carried out after 15 August. Rec. 11-20: Some BCD reports received late. Rec. 17-09: some eBCD requests are followed-up late by EU-Administrators entailing pending requests for several days in the eBCD system; Rec. 17-07; 16-05 and 12-07: Inspection reports received late. Rec. 14-07: No Access agreements reported, but previous reports show agreements until 2020 and also reported by Liberia, Morocco and Senegal. EU-Portugal BFT Other vessels over 15 m did not report any VMS messages. News reports of possible overharvest of bluefin tuna to be followed up in 2019.	Rec. 12-07: Submission of inspection reports not applicable as although 100% of foreign vessels are inspected, operations relate to the transfer from foreign catching vessels to reefer cargos of goods that are not for the EU market. For 17-07 and 16-05, the EU had transmission difficulties due to the volume of documents to be sent. Rec. 16-05: The transmission of these data suffered an internal IT problem that took time to solve. The listings were sent immediately after the problem had been solved. Rec. 17-07: The delay between the caging operation itself and the delivery of the related caging declaration is due to the time needed by the CPC's catching vessel flag States to amend their respective eBCD following the stereoscopic camera results. For JFOs, this may take more time, pending the completeness of the JFO related activities. The caging declarations are sent when declared as "final". Finalised caging declarations are sent once the eBCD amendments have been recorded. Caging after 15 August was due to weather conditions that hit the Mediterranean Sea, impacting the route of tug vessels. This is considered as force majeure. Rec. 14-07: The EU has concluded bilateral access agreements with Morocco, Gambia, Equatorial Guinea, Gabon, Cabo Verde, Mauritania, Senegal, Guinea-Bissau, Liberia, Côte d'Ivoire and Sao Tome & Principe. Because of the volume of this material, each year the EU refers to the website where each single agreement can be consulted: https://ec.europa.eu/fisheries/cfp/international/agreements_en		Conservation and Management Measures: Rec. 18-02: Possible late reporting of JFO changes (to individual quotas). Some caging declarations received late. <u>Capacity limits may be exceeded (see COC 303). EU-Portugal and EU-Greece BFT Other/Catching vessels over 15 m did not report any VMS messages.</u>	Caging declarations: this is a recurrent problem stemming from specific EU farm flag Member States which have to face huge amounts of caging operations. The time necessary to analyse and validate the caging footages, as well as the delay necessary to adapt the eBCD references in collaboration with the catching flags EU Member States or other CPCs justify the late transmission of the caging declarations and caging reports. Efforts have been deployed by the EU Member State concerned to address this issue. An extension of the delay to submit the requested documentation should be considered. Regarding VMS, The EU-Portugal vessels are not sending VMS positions because none of these vessels are targeting BFT (only by-catch); EU-Greece has regularly send those VMS reference to the EU all along 2019.

LIBYA	Annual Reports/ Statistics: National scientific observer programme data (ST09) received blank.	All shark fisheries and catches are prohibited in Libya. Are currently preparing legislation to comply with Rec. 16-12 and 17-08.	Letter on reporting issues, on implementation of ICCAT requirements on national scientific observers, sharks, and by-catch measures.	Annual Reports/ Statistics: Task II data in incorrect format. Rec. 16-14: Unclear if national scientific observer coverage is in line with provisions.	Libya could not have a certain program, hoping to establish it in near future and might require assistance from ICCAT Secretariat. Information has been collected from the crew and dead fish.	
	Conservation and Management Measures: Rec. 17-08: No response to request for SMA catches. Recs 10-09; 11-09; 11-10, 16-12: (by-catch requirements) Responses may be insufficient. Rec. 16-05: SWO MED management plan received late. Rec. 16-13. Not clear if legally binding measures have been taken to implement all shark requirements.			Conservation and Management Measures: Recs 10-09-13-11: Unclear if provisions are legally binding, despite infrequent interaction. Rec. 13-13: One vessel without IMO number on ICCAT Record. Rec. 18-02: One BFT vessel did not send VMS messages while operating in Mediterranean, 5-19 June.	The updated local Decree No. 33/2019, Article 26 shows the prohibition of catching sea turtles and to be released and returned to the sea after recorded in logbook, in fishing season 2019 there was no sea turtles and/or seabirds reported by Libyan purse seiners. Libya is working on update of General fishing law No. 14 issued on 1981; ICCAT fishery rules will be included. Rec. 13-13: Vessel owner is currently in correspondence with IHS Markit Rec. 18-02. Following investigation, a technical error was discovered which prevented the data being forwarded to ICCAT from Loqua; the missing data has been sent to the Secretariat.

<i>CPC</i>	<i>Potential issues of non-compliance-2018</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2018</i>	<i>Potential issues of non-compliance-2019</i>	<i>Response / explanation by CPC</i>	<i>Actions taken in 2019</i>
MOROCCO	Annual Reports/ Statistics: Reporting summary- Section 3 in Part II - incomplete (Blank in response to some requirements and 'not applicable' not explained in all cases) No national scientific observer programme data (ST09) received.	The 1st Annual Report / Part II / Section 3 was not the correct version. This version did not contain all the required information and was submitted by mistake. Following your e-mail of reminder, we realised that a mistake had been made, and the correct Annual Report / Part II / Section 3 incorporating the clarifications / additional information that you had raised was submitted to the ICCAT Secretariat on 19/10/2018. Therefore, all the parts are complete, and all the references to not applicable have been explained. In relation to the request regarding the national scientific observers programme (ST09), our response/method for requirement S10 is described in requirement S11 and was submitted to you on 27/07/2018. It states that due to the artisanal nature of the tuna fisheries, it is difficult to implement a scientific observer programme. However, an alternative method is described in the response to requirement S11.	Letter on reporting, while noting updated report provided prior to meeting, implementation of requirements on national scientific observer program and certain shark measures, possible blue marlin overharvest.	Annual Reports/ Statistics: Summary and Part V of Annual Report received late.		
	Conservation and Management: Rec. 15-05; 16-11: no information presented. Rec 10-09 and 11-10: no information presented. Rec. 16-13 Possibly no legally binding measures to implement porbeagle and silky shark species specific measures.	Rec. 15-05: Morocco does not have a fleet targeting marlins. Catches of this species are caught incidentally and reported to the ICCAT Secretariat in Tasks I and II. Consequently, there are currently no management measures for this species, but a measure will be taken. The monitoring and control measures cover all fishing activities, regardless of the species. These measures comprise in particular: • Controls at ports of landing, fishing sites and fish markets; • Control of vessels by satellite (positioning and location device "VMS"); • Controls of vessels at sea carried out by the control authorities; • A system of mandatory reporting of catches on landing and monitoring of trend in trade through the catch certification procedure. Computerisation of this process has led to the availability of information on catch trends and better exploitation for more effective and efficient control and verification, with the aim of overcoming illegal, unreported and unregulated (IUU) fishing. Rec. 16-11: Sailfish has never been included in Morocco's statistics. Consequently, there are no management measures on this species; Rec. 10-09 and Rec. 11-10: The Annual Report signals that this information was reported in the Annual Report: Task II / Section 7, transmitted to the ICCAT Secretariat on 27/07/2018. – By-catches of sea birds and by-catch rate of sea turtles. Field surveys of sea fishers of longliners targeting tuna and tuna-like species have indicated the following: the two main species of turtle taken as by-catch are the loggerhead sea turtle (<i>Caretta caretta</i>) and the leatherback sea turtle (<i>Dermochelys coriacea</i>). The leatherback sea turtle is clearly the most dominant. These species are rarely found in fishing operations. For reference only, these turtles can be caught on the longline once for every 10 trips carried out. When the turtle is caught alive in their longlines, the fishers unhook the animal before releasing it into the water. If the turtle is dead or has already swallowed the hook, the fishers cut the closest line to the hook then release the turtle into the sea. Regarding sea birds, no information is currently available on by-catches of these species, although the fishers have indicated that these sea birds are often observed in the sky, but they are never taken in their gears. In relation to the request regarding measures taken to mitigate by-catch and reduce discards and on any relevant research, our response to requirement S42 which was transmitted to the ICCAT Secretariat on 27/07/2018 states that a reflection is underway within the framework of the research work to reduce shark by-catch in the longline fishery targeting swordfish. No discards of by-catch are currently recorded in this fishery. For the majority of shark species, legally binding measures exist except for porbeagle and silky sharks, as these species are not found or very rarely found in Moroccan fisheries, but measures will be taken.		Conservation and Management Measures:		

	Quotas and catch limits. Task I data indicates overharvest of blue marlin, but no compliance table for marlins submitted.	Will rectify tables as needed.		Quotas and catch limits:		
	Other issues: ROP-BFT PNCs and responses presented in Doc. COC-305/18.			Other issues: ROP_BFT: See COC-305/19 for a list of PNCs and responses and COC-312/2019 for information under Rec. 08-09.

NORWAY	Annual Reports/ Statistics: No national scientific observer programme data (ST09) received; programme in place but applicability no clear from annual report.	Norway did not have a specific National Scientific Observer Program for bluefin tuna in 2017. Only one purse seine vessel fished actively for bluefin tuna in 2017, and it is not clear from the ICCAT recommendations whether a national scientific observer programme is required for purse seine vessels. The vessel carried a regional observer 100% of the time, as required in Rec. 17-07, and a national scientific observer from the Norwegian Institute of Marine Research was on board the vessel 60% of the time the vessel was fishing actively for bluefin tuna. After noting that the COC views this as a potential issue of non-compliance, we have tried to utilize the information in the report from the regional observer and combine this with our own data to provide the required data in ST09. The data were forwarded to the ICCAT Secretariat 5 November 2018. We have also started the process of establishing a national scientific programme for 2019, which will also include purse seine vessels.	No action necessary.	Annual Reports/ Statistics:		
	Conservation and Management Measures: Rec. 10-09: Response may be insufficient. Rec. 16-13. Possibly no legally binding measures to implement shark species specific requirements.	There have never been any turtles encountered in Norwegian waters or fisheries. Norway applied for exemption but shark group unable to review. The specific shark species do not occur in Norwegian waters.		Conservation and Management Measures:		
	Quotas and catch limits:			Quotas and catch limits:		
	Other issues:			Other issues: ROP_BFT: See COC-305/19 for a list of PNCs and responses.

SÃO TOMÉ & PRÍNCIPE	Annual Reports/ Statistics: Annual Report incomplete, no reporting summary table received. No Task II data received; No national scientific observer programme data (ST09) received or any alternative measures. No reply to individual COC letter was received.	We think that this information should be provided by the flag country of the vessels and we are not familiar with the form ST09. Nevertheless, we undertake to complete it in the future.	Letter due on reporting issues, no list of designated ports (Rec. 12-07), notification of access agreements, implementation of requirements on national scientific observer programs, billfish, sharks, no reply to COC Chair letter after 2017 meeting.	Annual Reports/ Statistics: No Annual Report, no statistical data; Rec. 16-14: No ST11/ST09 - observer information or data.		
	Conservation and Management Measures: Rec. 17-08: no response to request for SMA catches. Rec. 14-07: Updates to access agreements in 2018 not submitted. Rec. 15-05 and 16-11: no information relating to the implementation of billfish measures. Rec. 16-01: No quarterly reports for BET in 2017. Rec. 12-07: No list of designated ports. Rec. 16-13: No legally binding measures to implement shark requirements. Rec. 12-07: No list of designated ports.	We have some difficulty in establishing a management plan for ICCAT species. We are implementing a national strategy and action plan for the fisheries sector which will assist us in these areas. As you know, STP has improved its statistics and reporting to ICCAT, but there is still room for improvement. In relation to Task II data only in 2018 we have started to collect data on the size of all ICCAT species. Legislation in place to ban retaining shark species on board, as well as a turtle ban, No shark by-catches in the industrial fisheries.		Conservation and Management Measures: Rec. 16-01: No response to reporting requirements e.g. Quarterly BET catch reports for the 4th quarter of 2018 and 2019 not submitted. Rec. 18-05: Billfish check sheet not submitted. Rec. 18-06: No update of shark check sheets (not submitted); Rec. 12-07/18-09: No authorised list of ports; Rec. 14-07: Requirements on Access agreements not submitted.		
	Quotas and catch limits: Compliance tables submitted late.			Quotas and catch limits:		
	Other issues:			Other issues: No response to letter from COC Chair.
