 - (ii) promote, where necessary, the conservation of other species that are dependent on or associated with ICCAT species, with a view to maintaining or restoring populations of such species above levels at which their reproduction may become seriously threatened.

These recommendations shall become effective for the Members of the Commission under the conditions laid down in paragraphs 2 and 3 of this Article.

- (b) The recommendations referred to above shall be made:
 - (i) at the initiative of the Commission if an appropriate Panel has not been established;

 - (ii) the recommendation unjustifiably discriminates in form or in fact against the objecting Member of the Commission;
 - (iii) the Member of the Commission cannot practicably comply with the measure because it has adopted a different approach to conservation and sustainable management or because it does not have the technical capabilities to implement the recommendation; or
 - (iv) security constraints as a result of which the objecting Member of the Commission is not in a position to implement or comply with the measure.
- (d) Each Member of the Commission that presents an objection pursuant to this Article shall also provide to the Commission, to the extent practicable, a description of any alternative conservation and management measures, which shall be at least equally effective as the measure to which it is objecting.
