

**SECRETARIAT REPORT TO THE PERMANENT WORKING GROUP FOR THE IMPROVEMENT OF  
ICCAT STATISTICS AND CONSERVATION MEASURES (PWG)**

*ICCAT Secretariat*

**1. Statistics document, bluefin catch documentation programmes and other trade data**

A comparison between statistical documents data (bi-annual bigeye and swordfish reports) and Task 1 nominal catch data is provided in Tables 24 and 25 of document PLE-105/21. Trade data in accordance with Rec. 06-13 are contained in Annex 1 of COC-303/21.

***Validation and other information required***

Validation information on institutions and people authorised to validate the ICCAT statistical document is published on a password protected website: <https://www.iccat.int/en/SDPsummary.asp>

In accordance with Recs. 01-21 and 01-22, data collected under the bi-annual Statistical Documents and/or Re-export Certificates of swordfish and bigeye, which have been updated in several cases, covering the reporting period from the second semester of 2020 (S2/2020) to the first semester of 2021 (S1/2021), were received by the Secretariat from the following CPCs: Canada, China, Côte d'Ivoire, El Salvador, EU (all flags combined), Ghana, Japan, Korea, Morocco, Senegal, Turkey, United States, and, Chinese Taipei. Some late bi-annual reports were made by Côte d'Ivoire, and Senegal.

Iceland, Norway and Trinidad and Tobago confirmed no imports of these species to report.

These SDP bi-annual reports reveal that some quantities of both bigeye tuna and swordfish continue to be imported by CPCs from unclear/unknown fishing areas and unclassified fishing flags making it difficult to distinguish whether these have submitted their validation information or not. They also show that bigeye imports were made from two fishing flags whose validation information has never been submitted to the Secretariat. To date, the validation information is still missing from Oman regarding bigeye only. The Secretariat had contacted Oman to request them to consider adding SDP validation information for bigeye. The Secretariat also contacted Papua New Guinea requesting to consider adding SDP validation information for bigeye.

Information on bi-annual reports is published on the password protected website: <https://www.iccat.int/en/SDPsummary.asp>

***BCDs and BFTRC submission and processing***

The Secretariat received, between 6 October 2020 and 1 October 2021: 0 BCD splits and 5 re-export certificates (4 in November 2020 and 1 in 2021).

The information from these documents is published on the website at: <https://www.iccat.int/en/BCD.asp>

***Implementation of the eBCD system***

The number of eBCDs and BFTRCs recorded in the eBCD system from 8 October 2020 to 1 October 2021 was of 17821 BCDs (15060 E-BFT and 2761 W-BFT) and 2098 BFTRC.

The eBCD Technical Working Group (TWG) met in June 2021, and the report is available as PWG-403/2021

The main proposals approved for development during this meeting were the functionality to reverse the synchronisation of information related to Join Fishing Operations (at the beginning of the year, a successful reversal of the synchronization of the Ports, Farms and Traps information was launched in the eBCD System) and the functionality that allows parallel transfers in those eBCDs related to Live Trading was developed.

Under the maintenance contract, and at the request of the Secretariat, some of the messages that the eBCD system displays to users will be modified to make them easier to understand and to avoid the intervention of User Support Team in resolving queries about them.

Version 1.35 of the eBCD system was released in April, which allows the synchronisation of inactive vessels as well as the correction of some minor bugs.

Please see document PWG-403/21 (eBCD Technical Group Report) for further information on the current status of ICCAT's eBCD System.

## **2. Observer Programmes**

### ***ICCAT Regional Observer Programmes***

Document PWG-402/21 contains the report on ICCAT Regional Observer Programme on transshipment, and document PA2-601/21 a report on the implementation of the ICCAT Regional Observer Programme for eastern Atlantic and Mediterranean bluefin tuna (ROP-BFT), with alternative measures implemented as a result of the COVID-19 pandemic in COC-302/21.

### ***National / domestic observer programmes***

National observers are currently required on certain percentages of eastern Atlantic and Mediterranean bluefin tuna catching vessels (other than purse seiners) and on all bluefin tuna towing vessels and traps [Rec. 19-04], as well on tropical tuna vessels fishing in the Gulf of Guinea during the FAD closure [Rec. 19-02] for compliance purposes. No specific format for the information collected has been developed beyond the standard statistical data forms.

The *Recommendation by ICCAT to Establish Minimum Standards for Fishing Vessel Scientific Observer Programs* [Rec. 16-14] requires the submission of certain information; a summary of information received is contained in COC-317/2021.

## **3. At-sea and in-port transshipment requirements**

See PWG-402/21 above. CPC reports on transshipment (at sea and in port) have been published on the password protected website, together with the comprehensive reports assessing the content and conclusions of observer reports.

## **4. Rules for chartering and other fishing arrangements**

The summary report on chartering were submitted in 2021 by Namibia is contained in in Appendix 2 of COC-303/21.

The information on chartering arrangements received by the Secretariat in accordance with paragraph 13 of Rec. 13-14 is presented in Table 10 to COC-303/21.

In accordance with Rec. 14-07, the summary of access agreements reported by CPCs is available in Annex 6 to COC-303/21. At the beginning of the year 2021, a single form (CP53) is available, and the process of the submission had been circulated to the CPCs (Circular #0726/21). This new form was correctly used by most of the CPCs and greatly improved the coordination of the request to circulate the information.

## **5. At-sea vessel sighting and inspection programs**

A vessel sighting sheet under Rec. 19-09 was sent by the United States regarding the fishing vessel "Full Always", with Chinese Taipei Flag. This sighting was carried out in high seas, in the West Atlantic Ocean within ICCAT's Convention Area at the beginning of April.

The reports from the Joint Inspection Scheme carried out in accordance with Rec. 18-02/19-04 and Rec. 16-05 have been summarised in Table 2 of COC-303/21.

Reports were received from EU, Tunisia and Turkey. Some reports included infringements, and some did not, but summaries were not sent in all cases. The responses to the infringements reported under the JIS will be published as Table 2 of COC-303, where available.

**Request from the Secretariat:** CPCs submitting all inspection reports are requested to do so in two separate blocks; those with infringements and those without. In addition, a summary table of the reports submitted, and the infringement found would be of great assistance, as in many cases the reports are completed by hand often illegible or difficult to decipher.

## 6. Port inspection schemes and other port State measures

The list of ports into which foreign vessels may enter has been published on <https://iccat.int/en/Ports.asp> together with contacts and prior-entry request times.

A summary of port inspection reports received is contained in Table 3 of COC-303/21, and apparent infringements and responses are included in Annex 9 of COC-303/21.

## 7. Vessel registration requirements

For the current state of the ICCAT Record of Vessels, please see the summary contained in **Table 1**.

The lists of vessels that have carried out fishing operations in the previous year in the tropical, Mediterranean swordfish and eastern Atlantic and Mediterranean bluefin tuna fisheries is presented in Annex 5 of COC-303/21.

Some reporting issues persist, such as incomplete reporting of vessel characteristics, particularly those which are mandatory. **Table 2** provides detailed information by CPC in this regard.

The work carried out by the Secretariat with the CPCs these last years clearly allowed further significant progress concerning the collection of IMO numbers. As can be seen from **Table 3**, a total of 309 vessels of 20 meters in length overall or greater were reported as being justified in not having an IMO number. Of these, 306 are not commercial vessels, all reported as recreational/sport, and hence are not required to have an IMO number. Written explanations of the justification have been received from two EU-Italian flagged vessels, and one from a Venezuelan-flagged vessel which are currently active. As of 2 of November 2021, in the ICCAT Record there are no commercial fishing vessels of 20 meters in length overall or greater without IMO numbers for which no justification has been received. The proportion of vessels of 20 meters in length overall or greater with IMO numbers has significantly increased in comparison with last year, from 60.50% to 61.24%.

Since the Commission authorised the Secretariat to deactivate those vessels whose authorisations have expired, vessels with expired authorisations of 45 or more days are regularly moved to the ICCAT Record of Inactive Vessels.

## 8. Vessel Monitoring System requirements

Information on the VMS messages received at the Secretariat is contained in Tables 4, 5 and 6 of document COC-303/21.

**9. Flag State responsibilities**

Rec. 03-12 does not require the submission of specific information; the Secretariat has nothing to report.

**10. Review and establishment of the IUU vessel list**

The draft 2021 ICCAT IUU List, for consideration and possible adoption by the Commission, is contained in document PWG-405/21.

It is important to note the clarifications made by the IMM Group at the Intersessional IMM meeting held in June 2021 (Appendix 9 of the Report PWG-404/21).

**Table 1.** Number of vessels registered (total, active, inactive, inoperative) by flag CPC, and number of vessels authorised in each list (source: ICCAT vessel record database, as of 2020-11-02).
